

The diagram illustrates a pile foundation system. At the top, a horizontal line represents the ground surface, labeled "NON-LIQUEFIABLE CRUST". Below this is a thick, textured orange-brown region labeled "LIQUEFIABLE LAYER". At the bottom is a darker, more uniform region labeled "BEARING LAYER". A vertical pile is shown, with its top section labeled "PILE CAP". The pile passes through the liquefiable layer and terminates in the bearing layer. A series of horizontal arrows of increasing length point from the pile into the liquefiable layer, representing lateral soil resistance. The pile is labeled with "A" at its base and "B" at a higher point. A circular symbol with a cross inside is located at the base of the pile, with the text $k_r =$ next to it.
