Design Science Research A Method For Science And Technology Advancement:

Design Science Research Aline Dresch, Daniel Pacheco Lacerda, José Antônio Valle Antunes Jr, 2014-08-19 Consolidating existing knowledge in Design Science this book proposes a new research method to aid the exploration of design and problem solving within business science and technology It seeks to overcome a dichotomy that exists in the field between theory and practice to enable researches to find solutions to problems rather than focusing on the explanation and exploration of the problems themselves Currently researches concentrate on to describing exploring explaining and predicting phenomena and little attention is devoted to prescribing solutions Herbert Simon proposes the need to develop a Science of the Artificial Design Science arguing that our reality is much more artificial than natural However the research conducted on the Design Science premises has so far been scattered and erratic in different fields of research such as management systems information and engineering This book aims to address this issue by bringing these fields together and emphasising the need for solutions This book provides a valuable resource to students and researchers of research methods information systems management and management science and production and operations management

Science in Design Tarun Grover, Mugdha Thareja, 2020-12-21 There is an important overlap between science and design The most significant technological developments cannot be produced without designers to conceptualize them By the same token designers cannot do their job properly without a good understanding of the scientific or technical principles that are being developed within the product Science in Design Solidifying Design with Science and Technology reveals the significance of the essential yet understudied intersection of design and scientific academic research and encompasses technological development scientific principles and the point of overlap between science and design Encourages readers to comprehend the role of science in all facets of design Discusses the fundamental involvement of science required for engineering and design irrespective of whether the design is from an individual business or social perspective Covers the ontology characteristics and application of science in major fields of design education and design research with an introduction of emerging practices transforming sustainable growth through applied behavioral models Depicts the art and science of material selection using new design techniques and technology advances like augmented reality AI and decision support toolkits This unique book will benefit scientists technologists and engineers as well as designers and professionals across a variety of industries dealing with scientific analysis of design research methodology design lifecycle and problem solving

SPS2022 Amos H.C. Ng, Anna Syberfeldt, Magnus Holm, 2022-05-15 The realization of a successful product requires collaboration between developers and producers taking account of stakeholder value reinforcing the contribution of industry to society and enhancing the wellbeing of workers while respecting planetary boundaries Founded in 2006 the Swedish Production Academy SPA aims to drive and develop production research and education and to increase cooperation within the production area This book presents the proceedings of the 10th Swedish Production Symposium SPS2022 held in Skövde

Sweden from 26-29 April 2022. The overall theme of the symposium was Industry 5.0 Transformation Towards a Sustainable Human Centric and Resilient Production. Since its inception in 2007, the purpose of SPS has been to facilitate an event at which members and interested participants from industry and academia can meet to exchange ideas. The 69 papers accepted for presentation here are grouped into ten sections: resource efficient production, flexible production, humans in the production system, circular production systems and maintenance, integrated product and production development, industrial optimization and decision making, cyber physical production systems and digital twins, innovative production processes and additive manufacturing, smart and resilient supply chains and linking research and education. Also included are three sections covering the Special Sessions at SPS2022: artificial intelligence and industrial analytics in industry 4.0, development of resilient and sustainable production systems and boundary crossing and boundary objects in product and production development. The book will be of interest to all those involved in the development and production of future products.
