**Individual-based Methods in Forest Ecology and Management** Arne Pommerening,Pavel Grabarnik,2019-09-17

Model driven individual based forest ecology and individual based methods in forest management are of increasing importance in many parts of the world For the first time this book integrates three main fields of forest ecology and management i e tree plant interactions biometry of plant growth and human behaviour in forests Individual based forest ecology and management is an interdisciplinary research field with a focus on how the individual behaviour of plants contributes to the formation of spatial patterns that evolve through time Key to this research is a strict bottom up approach where the shaping and characteristics of plant communities are mostly the result of interactions between plants and between plants and humans This book unites important methods of individual based forest ecology and management from point process statistics individual based modelling plant growth science and behavioural statistics For ease of access better understanding and transparency the methods are accompanied by R code and worked examples      Jungian Psychology in the East and West Konoyu Nakamura,Stefano Carta,2021-07-29 It is well known that Jung s investigation of Eastern religions and cultures supplied him with an abundance of cross cultural comparative material useful to support his hypotheses of the existence of archetypes the collective unconscious and other manifestations of psychic reality However the specific literature dealing with this aspect has previously been quite scarce This unique edited collection brings together contributors writing on a range of topics that represent an introduction to the differences between Eastern and Western approaches to Jungian psychology Readers will discover that one interesting feature of this book is the realization of how much Western Jungians are implicitly or explicitly inspired by Eastern traditions including Japanese and at the same time how Jungian psychology the product of a Western author has been widely accepted and developed by Japanese scholars and clinicians Scholars and students of Jungian studies will find many new ideas theories and practices gravitating around Jungian psychology generated by the encounter between East and West Another feature that will be appealing to many readers is that this book may represent an introduction to Japanese philosophy and clinical techniques related to Jungian psychology      Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70      **Child and Adolescent Mental Health** Martin Henrik Maurer,2017-05-24 In the present volume we collected state of the art chapters on diagnosis treatment and social implications The first section describes diagnostic processes It describes a reevaluation of projective techniques a new clinical tool in psychotraumatology the foundations of the framing technique and an overview on integrative approaches The second section focuses on new developments in the field with special emphasis on culture specific contexts From parenting of adolescents in India to the influence of poverty on mental health issues in Mexico as well as the use of marijuana and Internet addiction some of the most important fields are highlighted The third section

concentrates on therapy It shows how to react to bullying and reviews the use of antidepressants in children and adolescents
