Raptors of New Mexico Jean-Luc E. Cartron,2010-08-16 No book has ever before specifically focused on the birds of prey of New Mexico Both Florence Bailey 1928 and J Stokley Ligon 1961 published volumes on the birds of New Mexico but their coverage of raptors was somewhat limited In the ensuing years a great deal of new information has been collected on these mighty hunters distribution ecology and conservation including in New Mexico The book begins with a history of the word raptor The order of Raptiformes or Raptiformes was first used to classify birds of prey in the early nineteenth century derived from the Latin word raptor one who seizes by force The text then includes the writings of thirty seven contributing authors who relate their observations on these regal species For example Joe Truett recounts the following in the chapter on the Swainson's Hawk From spring to fall each year at the Jornada Caves in the Jornada del Muerto Swainson's hawks assemble daily to catch bats The bats exit the caves actually lava tubes near sundown The hawks swoop in snatch bats from the air and eat them on the wing Originally from France Jean Luc Cartron has lived and worked on several continents finding his passion in the wide open spaces of New Mexico He became fascinated by the birds of prey and has studied their ecology and conservation for nearly twenty years *Raptors of New Mexico* will provide readers with a comprehensive treatment of all hawks eagles kites vultures falcons and owls breeding or wintering in New Mexico or simply migrating through the state This landmark study is also beautifully illustrated with more than six hundred photographs including the work of more than one hundred photographers and more than twenty species distribution maps Falconry. Emma Ford,1998 **Special Bibliography Series** ,1957 *The Raptors of Arizona* Richard L. Glinski,2021-11-16 Thousands of birdwatchers come to Arizona each year seeking rare or intriguing species and for those watching the skies the additional sighting of a bird of prey is a reward in itself The Grand Canyon state boasts the most dramatic assortment of raptors in North America hawks eagles falcons kites and owls plus vultures and condors Here can be found nearly all the raptor species of the continental United

States and also established populations of species associated with Mexico such as the Gray Hawk Common Black Hawk Zone tailed Hawk and Whiskered Screech Owl Arizona s raptors are found in an unrivaled diversity of habitats from saguaro cactus forests where tiny Elf Owls nest to the Vermilion Cliffs where the gigantic California Condor was introduced in 1996 Yet many species live in habitats that are now jeopardized by degradation or development making an understanding and appreciation of raptors crucial to their survival The Raptors of Arizona brings together the knowledge and insights of 29 raptor and wildlife authorities who provide original information and syntheses on Arizona s 42 raptor species with an emphasis on aspects of their natural history in Arizona A chapter on each bird includes its description a range map and information on its distribution habitat life history and status Additional chapters cover conservation habitats where and when to watch raptors and the sport of falconry The book is enhanced by 42 full color illustrations by Richard Sloan one of the premier wildlife artists in North America whose paintings were commissioned by the Arizona Wildlife Foundation specifically for this project Co published with the Arizona Game and Fish Department **Hawk Chalk** ,2003 Vol 8 no 2 Aug 1969 includes Northwest falconry news v 4 no 1 1969 **Special Bibliography Series** United States Air Force Academy.
