Hijacking Sustainability Adrian Parr, 2012-02-10

How the sustainability movement has been co-opted from ecobranding by Wal Mart to the greening of the American military. The idea of sustainability has gone mainstream. Thanks to Prius driving movie stars it's even hip. What began as a grassroots movement to promote responsible development has become a bullet point in corporate ecobranding strategies. In *Hijacking Sustainability* Adrian Parr describes how this has happened how the goals of an environmental movement came to be mediated by corporate interests government and the military. Parr argues that the more popular sustainable development becomes the more commodified it becomes the more mainstream culture embraces the sustainability movement's concern over global warming and poverty the more sustainability culture advances the profit maximizing values of corporate capitalism. And the more issues of sustainability are aligned with those of national security the more military values are conflated with the goals of sustainable development. Parr looks closely at five examples of the hijacking of sustainability: corporate image greening Hollywood activism gated communities the greening of the White House and the incongruous efforts to achieve a sustainable army. Parr then examines key challenges to sustainability: waste disposal disaster relief and environmental refugees slum development and poverty. Sustainability Parr says offers an alternative narrative of the collective good an idea now compromised and endangered by corporate military and government interests.

Reading the Architecture of the Underprivileged Classes Nnamdi Elleh, 2016-04-01

The expansion of cities in the late C19th and middle part of the C20th in the developing and the emerging economies of the world has one major urban corollary: it caused the proliferation of unplanned parts of the cities that are identified by a plethora of terminologies such as bidonville favela ghetto informal settlements and shantytown. Often the dwellings in such settlements are described as shacks architecture of necessity and architecture of everyday experience in the modern and the contemporary metropolis. This volume argues that the types of structures and settlements built by people who do not have access to architectural services in many cities in the developing parts of the world evolved simultaneously with the types of buildings that are celebrated in architecture textbooks as modernism. It not only shows how architects can learn from traditional or vernacular dwellings in order to create habitations for the people of low income groups in public housing scenarios but also demonstrates how the architecture of the economically underprivileged classes goes beyond culturally inspired tectonic interpretations of vernacular traditions by architects for high profile clients. Moreover the essays explore how the resourceful dwellings of the underprivileged inhabitants of the great cities in developing parts of the world pioneered certain concepts of modernism and contemporary design practices such as sustainable and de constructivist design. Using projects from Africa Asia South and Central America as well as Austria and the USA this volume interrogates and brings to the attention of academics students and practitioners

of architecture the deliberate disqualification of the modern architecture produced by the urban poor in different parts of the world *Mobilities Design* Ole B. Jensen, Ditte Bendix Lanng, 2016-10-04 Contemporary society is marked and defined by the ways in which mobile goods bodies vehicles objects and data are organized moved and staged Against the background of the mobilities turn this book articulates a new and emerging research field namely that of mobilities design The book revolves around the following research question How are design decisions and interventions staging mobilities It builds upon the Staging Mobilities model Jensen 2013 in an exploratory inquiry into the problems and potentials of the design of mobilities The exchange value between mobilities and design research is twofold To mobilities research this means getting closer to the material and to engage in the creative exploratory and experimental approaches of the design world which offer new potential for innovative research Design research on the other hand might enter into a fruitful relationship with mobilities research offering a relational and mobile design thinking and a valuable basis for design reflections around the ubiquitous structures spaces and systems of mobilities **Handbook of Human Factors and Ergonomics** Gavriel

Salvendy, 2012-03-13 The fourth edition of the Handbook of Human Factors and Ergonomics has been completely revised and updated This includes all existing third edition chapters plus new chapters written to cover new areas These include the following subjects Managing low back disorder risk in the workplace Online interactivity Neuroergonomics Office ergonomics Social networking HF E in motor vehicle transportation User requirements Human factors and ergonomics in aviation Human factors in ambient intelligent environments As with the earlier editions the main purpose of this handbook is to serve the needs of the human factors and ergonomics researchers practitioners and graduate students Each chapter has a strong theory and scientific base but is heavily focused on real world applications As such a significant number of case studies examples figures and tables are included to aid in the understanding and application of the material covered DesignBuild

in Postcolonial Contexts: A Critical Interrogation Vera Simone Bader, In diesem Buch betrachten neun Autorinnen die Lernmethode DesignBuild im postkolonialen Kontext Anhand konkreter Beispiele wird die handlungsorientierte Vorgehensweise kritisch hinterfragt und evaluiert Dabei liegt ein Fokus auf den Auslandseinsätzen europäischer und US-amerikanischer Studierender die in fremden Kulturen ihr frisch erworbenes Wissen aktiv einsetzen Es werden aber auch Projekte von Studierenden aus Lateinamerika Asien und Afrika dokumentiert und analysiert die diese Methode als Experimentierfeld nutzen um normative Regeln die häufig noch heute von der Kolonisierung geprägt sind in Frage zu stellen

Low Carbon Cities Steffen Lehmann, 2014-09-15 Low Carbon Cities is a book for practitioners students and scholars in architecture urban planning and design It features essays on ecologically sustainable cities by leading exponents of urban sustainability case studies of the new directions low carbon cities might take and investigations of how we can mitigate urban heat stress in our cities microclimates The book explores the underlying dimensions of how existing cities can be transformed into low carbon urban systems and describes the design of low carbon cities in theory and practice It considers the

connections between low carbon cities and sustainable design social and individual values public space housing affordability public transport and urban microclimates Given the rapid urbanisation underway globally and the need for all our cities to operate more sustainably we need to think about how spatial planning and design can help transform urban systems to create low carbon cities and this book provides key insights [The Interiors Theory Primer](#) William Mangold,2025-07-31 In a world where life is increasingly defined by the spaces we inhabit understanding interiors is essential to understanding ourselves The Interiors Theory Primer maps the intellectual terrain of interior design and spatial experience introducing readers to key concepts that shape how people occupy interior spaces Organized into three parts this book begins with foundational concerns such as place identity materiality and atmosphere and then examines the boundaries and expertise of the discipline before turning to critical and emerging topics like biophilia virtuality and social justice Each chapter presents a focused literature review of a major theme in interiors theory supported by key design precedents and suggestions for further reading Drawing on a wide range of scholarship The Interiors Theory Primer offers a coherent framework for understanding interiors as a distinct interdisciplinary field deeply embedded in the human condition Accessible to students useful to professionals and provocative for scholars The Interiors Theory Primer argues that the designed environments in which we live work and gather deserve greater attention not only for their aesthetic and functional qualities but also for their powerful role in shaping contemporary life *Design and the Social Imagination* Matthew DelSesto,2022-09-22 How can social theory help us all design solutions to address the social political and ecological challenges that confront us and build more sustainable communities Design professions have typically been associated with intervention and action while social science has long been associated with thought and reflection Design and social thought are too frequently considered distinct in terms of how theories can be applied in practice Design and the Social Imagination brings together the creative action oriented sensibility of design with the reflective analytical capacities of the social sciences to offer models ideas and strategies for shaping the future of the world we live in In a world of global economic inequality racism and environmental degradation designing with an understanding of our social reality is increasingly crucial to our survival Matthew DelSesto explores current practices and discourses in areas of urban design design for social innovation environmental design co design service design and more illustrating how thoughtful design can contribute in a more productive way Drawing on a range of theory and practice from radical social thinkers C Wright Mills Patrick Geddes Jane Addams and W E B Du Bois his book shows us how design and the social sciences can interact in order to intervene in the crises we face today
