Computer-Based Instruction in Military Environments
Robert J. Seidel,P.D. Weddle,2012-12-06 This collection of papers is the result of a symposium sponsored by NATO s Defense Research Group Panel VIII in the Spring of 1985 The symposium came into being when it became obvious to the NATO countries that research development and utilization of advanced technologies for training was the best means of increasing both training effectiveness and efficiency This symposium was the second in a series of three devoted to training The series was structured to cover all aspects of training The first series addressed the value of training the second one dealt with the application of training technologies and the third and last of the series focused on academic issues concerned with the effect of prior learning on subsequent learning The fact that a major American publisher has determined that computer based instruction is the technology of greatest interest to the NATO community is not surprising Advances in microprocessor technology have revolutionized both how and where we train During this symposium there were a limited number of carefully chosen exhibits to demonstrate the various applications of computer based training techniques In the following papers you will find both a practical and scientific basis for the way current and future training and training systems should be designed applied and utilized We know that training must be done faster and more effectively

Linguistic Minority Students Go to College
Yasuko Kanno,Linda Harklau,2012-04-23 Currently linguistic minority students students who speak a language other than English at home represent 21% of the entire K 12 student population and 11% of the college student population Bringing together emerging scholarship on the growing number of college bound linguistic minority students in the K 12 pipeline this ground breaking volume showcases new research on these students preparation for access to and persistence in college Other than studies of their linguistic challenges and writing and academic literacy skills in college little is known about the broader issues of linguistic minority students access to and success in college Examining a variety of factors and circumstances that influence the process and outcome the scope of this book goes beyond students language proficiency and its impact on college education to look at issues such as student race ethnicity gender SES and parental education and

expectations It also addresses structural factors in schooling including tracking segregation of English learners from English fluent peers availability and support of institutional personnel and collegiate student identity and campus climate Presenting state of the art knowledge and mapping out a future research agenda in an extremely important and yet understudied area of inquiry this book advances knowledge in ways that will have a real impact on policy regarding linguistic minority immigrant students higher education opportunities

Computer-Based Testing Craig N. Mills, Maria T. Potenza, John J. Fremer, William C. Ward, 2005-04-11

Although computer based tests CBT have been administered for many years improvements in the speed and power of computers coupled with reductions in their cost have made large scale computer delivery of tests increasingly feasible CBT is now a common form of test delivery for licensure certification and admissions tests Many large scale high stakes testing programs have introduced CBT either as an option or as the sole means of test delivery Although this movement to CBT has to a great extent been successful it has not been without problems Advances in psychometrics are required to ensure that those who rely on test results can have at least the same confidence in CBTs as they have in traditional forms of assessment This volume stems from an ETS sponsored colloquium in which more than 200 measurement professionals from eight countries and 29 states convened to assess the current and future status of CBT The formal agenda for the colloquium was divided into three major segments Test Models Test Administration and Test Analysis and Scoring Each segment consisted of several presentations followed by comments from noted psychometricians and a break out session in which presenters and discussants identified important issues and established priorities for a CBT research agenda This volume contains the papers presented at the colloquium the discussant remarks based on those papers and the research agenda that was generated from the break out sessions Computer Based Testing Building the Foundation for Future Assessments is must reading for professionals scholars and advanced students working in the testing field as well as people in the information technology field who have an interest in testing
