Foundations of Sport-Related Brain Injuries Semyon M. Slobounov, Wayne J. Sebastianelli, 2006-08-25 This book is the partial product of a conference on concussion in athletics held at the Pennsylvania State University April 29 30 2004 For a number of reasons it seemed timely to hold such a conference as well as to condense our current understanding of mechanisms predispositions and latest developments in evaluation and managements of sport related concussions in a single book format Despite dramatic advances in medicine traumatic brain injury commonly know as concussion is still one of the most puzzling and least understood injuries facing the sport medicine world today There still no universal agreement assigning the level of severity the sport related concussions nor there is any treatment besides the passage of time Medicines inability to fully understanding concussion has led us to question when it is truly safe to return an athlete to full sport participation so threat for risk of re injury is minimized The need for a multidisciplinary approach to understanding the spo related concussions stem from recent evidence that there are long lasting residual behavioral psycho social and neural disabilities that are often overlooked using current research methods The notion of transient and rapid symptoms resolution is misleading since symptoms resolution is frequently not indicative of injury resolution There are no two traumatic brain injuries alike in mechanism symptomology or symptoms resolution Most grading scales are based on loss of consciousness and post traumatic

amnesia both of which occur infrequently in sport related mild traumatic brain injuries Sociocultural Examinations of Sports Concussions Matt Ventresca, Mary McDonald, 2019-11-18 Sport's concussion crisis has been characterized by controversial scientific discoveries athlete suicides and high profile lawsuits involving professional sports leagues while provoking widespread media coverage changes to game rules and debate about the future of many popular sports Sociocultural Examinations of Sports Concussion is the first edited collection to bring together multiple sociocultural perspectives on sports concussion that interrogate the social economic political and historical forces shaping the cultural impacts of these injuries Each of the ten chapters moves beyond biomedical or neuroscientific paradigms to critically examine a specific intersection of sociocultural factors influencing public perceptions about concussion or athlete experiences of brain injury These include analyses of media and advertising medical treatment and diagnostic protocols gender and masculinity developments in equipment and scientific models economics and labor politics understandings of trauma and recovery public health philosophies and disciplinary differences in framing the ontologies of concussion Drawing from a wide range of theoretical and methodological approaches Sociocultural Examinations of Sports Concussion offers a diverse set of analyses examining brain injuries as cultural and embodied phenomena affecting more than just athletes brains but also embedded within and re shaping meanings identities and social contexts It is valuable reading for graduate students and researchers interested in the experience and treatment of sports concussion sports sociology and sports technology
