H. Newton Malony

Current Perspectives In The Psychology Of Religion:

Current Perspectives in the Psychology of Religion H. Newton Malony, 1977 **The Psychology of Religion** Ralph W. Hood, Jr., Peter C. Hill, Bernard Spilka, 2018-07-23 Keeping up with the rapidly growing research base the leading graduate level psychology of religion text is now in a fully updated fifth edition It takes a balanced empirically driven approach to understanding the role of religion in individual functioning and social behavior Integrating research on numerous different faith traditions the book addresses the quest for meaning links between religion and biology religious thought belief and behavior across the lifespan experiential dimensions of religion and spirituality the social psychology of religious organizations and connections to coping adjustment and mental disorder Chapter opening quotations and topical research boxes enhance the readability of this highly instructive text New to This Edition New topics cognitive science of religion religion and violence and groups that advocate terrorist tactics The latest empirical findings including hundreds of new references Expanded discussion of atheism and varieties of nonbelief More research on religions outside the Judeo Christian tradition particularly Islam State of the art research methods including techniques for assessing neurological states

Augustine to Freud Kenneth Boa, 2004 Six theologians and eight psychologists from history square off finding both differences and common ground in their thinking on the most basic human needs **Religion, Belief and Unbelief** Antoon Vergote, 2024-03-11 This book focuses attention on the central elements of human religious existence Vergote's primary aim and viewpoint are clear to examine empirically and to interpret dynamically the psychological factors at work in the field of religion Vergote consistently adheres to the position that psychology is neither philosophy nor theology and that its task is not to explain religion In this work he situates religion as a cultural fact and studies how persons orient themselves to it positively and or negatively Rather than emphasise and juxtapose belief and unbelief as alternative positions he sees them as threads of experiences interwoven throughout the human existence of persons and institutions In this context he studies motivations and their ambivalences religious experiences and their ambiguities conflicts between religious belief and unbelief and the various expressions and practices of religion Religion and Mental Health, 1980 **Krishna**

Consciousness in the West David G. Bromley, Larry D. Shinn, 1989 Scholars of comparative religion theology philosophy History sociology and psychology and members of the Hare Krishna movement discuss the history theology and organization of the International Society for Krishna Consciousness and public reaction to the movement in America Misunderstanding Cults Thomas Robbins, Benjamin David Zablocki, 2001-01-01 Misunderstanding Cults provides a uniquely balanced contribution to what has become a highly polarized area of study Working towards a moderate third path in the heated debate over new religious movements or cults this collection includes contributions from both scholars who have been characterized as anticult and those characterized as cult apologists The study incorporates multiple viewpoints as well as a variety of theoretical and methodological perspectives with the stated goal of depolarizing the discussion over alternative

religious movements A prominent section within the book focuses explicitly on the issue of scholarly objectivity and the danger of partisanship in the study of cults The collection also includes contributions on the controversial and much misunderstood topic of brainwashing as well as discussions of cult violence children brought up in unconventional religious movements and the conflicts between alternative religious movements and their critics Unique in its breadth this is the first study of new religious movements to address the main points of controversy within the field while attempting to find a middle ground between opposing camps of scholarship

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult

Current Perspectives on Substance Use Disorders in South Asia S. M. Yasir Arafat, Sujita Kumar Kar, 2024-11-25 This book is about public mental health needs and aspects of substance use disorders in South Asian countries South Asia consists of eight countries with low and middle income backgrounds The people of this region with a combined population of around 2 billion share common cultures beliefs and behavioral patterns regarding physical and mental health Among them more than 66 million people use different forms of substances including cannabis opium and opiates amphetamine and prescription drugs Substance abuse brings deadly consequences It affects almost all spheres of life i.e. personal social recreational criminal and family aspects both physical and mental health and economy of the society as well as the country Advanced management and holistic prevention are public health priorities However very little attention has been paid to the issues as a region as well as in countries like Afghanistan Bangladesh and Pakistan Hence the editors of this book aimed to publish a book that discusses the public mental health and healthcare issues related to substance use disorder in a densely populated low and middle income setting
