an International Conversation Daniel F. Johnson-Mardones, 2018-04-09 Examining Curriculum Studies from an international perspective this book focuses on the relations between the Anglo Saxon and Latin American educational traditions Informed by William F Pinar's conceptualization of curriculum as currere Johnson Mardones reconsiders curriculum as an international conversation and advances an intercultural dialogue among educational traditions to put forth a more comprehensive and inclusive theory of curriculum Moving beyond the Anglo Saxon space and into the Global South Johnson Mardones brings in his own non Western educational experience to the center of this inquiry and situates cosmopolitanism as a necessary but complex component of Curriculum Studies The Curriculum of Everything:

Understanding education and curriculum José Augusto Pacheco, 2023-11-06 The Curriculum of Everything advances as the eternal future in which artificial intelligence surpasses the human capacity to do but not that of understanding and feeling Now even the father of Artificial Intelligence worries even those bedrocks of being understanding and feeling may be at risk Pacheco reminds us that curriculum study is a normative question now necessarily with its technological dimension Then in a stunningly synoptic sentence that students could usefully study all semester he summarizes the curriculum as a socially culturally ideologically politically and economically constructed practice is a formal and informal dispositive of interwoven relationships between knowledge power and technology Penetrated we become impregnated with the structures of software as Pacheco appreciates Technological devices are powerful instruments of subjectivity production moving the subject into

predefined ways of knowing Old fashioned rhetoric alright but insightfully implying we need to return to the past when we were still sort of human before we were seduced by supranational citizenship in the software state before we became submerged in the curriculum of everything Step back from the brink Pacheco has Let us join him William F Pinar Preface

Instrumentalism in Education James M. Magrini,2014-04-03 Distinct among contemporary philosophical studies focused on education this book engages the history of phenomenological thought as it moves from philosophy proper the European phenomenological hermeneutic tradition through curriculum studies It thus presents the best of both worlds for the reader there is a play or movement from philosophy proper to educational philosophy and then back again in order to locate and explicate what is intimated suggested and in some cases left unsaid by educational philosophers This amounts to a work on education philosophy that elucidates through various permutations within the unique foci of each essay the general phenomenological theme of the fundamental ontology of the human being as primordial learner Reflecting his experience as scholar teacher and perennial learner the author suggests how research in phenomenology might prove beneficial to the enhancement of both the theoretical and practical aspects of education readers are invited to envision education as far more than merely a means by which to organize an effective learning experience in which knowledge is assimilated and skill sets are efficiently imparted but rather as a holistic and integrated process in which knowing acting and valuing are original ways of Being in the world *The Handbook of Dewey's Educational Theory and Practice* Charles L.
