## **Cutting The Wire The Story Of The Landless Movement In Brazil:**

**Cutting the Wire** Sue Branford, Jan Rocha, 2002 Access to land is one of the key issues for developing countries and Brazil has one of the most inequitable land distributions in the world with vast tracts of land held by often absentee landowners Meanwhile thousands of peasants live in marginal lands in cities and rural areas The Brazilian Landless Workers Movement MST has proved a huge success with the disenfranchised rural and urban poor in Brazil becoming one of the largest social movements in the world Cutting the Wire is the first account in English of the origins history and current challenges faced by Brazil's poor majority The authors have traveled the vast expanse of the country to record the words and actions of hundreds of activists who have taken their lives into their own hands Cutting the Wire is how the MST describes the act of occupying the land the cornerstone of their movement It is the baptism of fire for the militant an essential part of their identity and it plays a key role in the *mística* the moment of collective ritual that kicks off all MST events Cutting the Wire is the story of the MST told in their own words in vivid first hand accounts of a continuing struggle Transnational Agrarian Movements Confronting Globalization Saturnino M. **Rural Social Movements in Latin America** Carmen Diana Deere, Frederick S. Royce, 2018-04-23 A remarkable collection The chapters provide extremely useful information on a range of social movements generally not well covered in academic work and the coverage is provided by people who are either activists within the movements themselves or long time supporters Wendy Wolford University of North Carolina An original unique and excellent collection The book has great theoretical value and political relevance Saturnino M Borras Jr Saint Mary's University Halifax All across Latin America rural peoples are organizing in support of broadly distinct but interrelated issues Food sovereignty agrarian reform indigenous and women's rights sustainable development fair trade and immigration issues are the focus of a large number of social movements found in countries such as Bolivia Colombia Mexico Nicaragua Brazil and Peru The contributors to Rural Social Movements in Latin America include academic researchers as well as social movement leaders who are seeking to effect change in their countries and communities As a group they are at the forefront of some of the most critical environmental social and political issues of the day This volume highlights the central role these movements play in opposition to the neoliberal model of development and offers fresh insights on emerging alternatives at the local national and hemispheric level It also illustrates and analyzes the similarities notably the struggle for sustainable livelihoods as well as the difference among these various peasant indigenous and rural women's movements

**Food Justice in US and Global Contexts** Ian Werkheiser, Zachary Piso, 2017-07-01 This book offers fresh perspectives on issues of food justice The chapters emerged from a series of annual workshops on food justice held at Michigan State University between 2013 and 2015 which brought together a wide variety of interested people to learn from and work with each other Food justice can be studied from such diverse perspectives as philosophy anthropology economics gender and sexuality studies geography history literary criticism philosophy and sociology as well as the human dimensions of agricultural and environmental sciences As such interdisciplinary workshops are a much needed vehicle to improve our understanding of the subject which is at the center of a vibrant and growing discourse not only among academics from a wide range of disciplines but also among policy makers and community activists The book includes their perspectives offering a wide range of approaches to and conceptions of food justice in a variety of contexts This invaluable work requires readers to cross boundaries and be open to new ideas based on different assumptions

**The Churches and Democracy in Brazil** Rudolf von Sinner, 2012-05-04 Brazil is a rapidly emerging country Brazilian theology namely the Theology of Liberation has become well known in the 1970s and 1980s The politically active Base Ecclesial Communities and the progressive posture of the Roman Catholic Church contrasted with a steadily growing number of evangelicals mostly aligned with the military regime but attractive precisely to the poor After democratic transition in the mid 1980s the context changed considerably Democracy growing religious pluralism and mobility a vibrant civil society the political ascension of the Worker's Party and growing wealth albeit within a continuously

wide social gap are some of the elements that show the need of a new approach to theology. It must be a theology that is both critical and constructive, resisting and cooperative, a theology that is able to give orientation to the churches, valuing and encouraging their contribution in society while avoiding attempts of imposition. *The Churches and Democracy in Brazil* the fruit of years of interdisciplinary study of the Brazilian context and its main churches and theology makes its case for an ecumenically articulated public theology. It seeks inspiration mainly in Luther and Lutheran theology, emphasizing human dignity, freedom, trust, the disposition to serve and the ability to endure the ambiguities of reality as well as a fresh interpretation of the doctrine of the two regiments. These are the fundamental elements of what makes human beings full members of the body politic, citizenship, their right to have rights and to be able to effectively live them together with their corresponding duties in a move of growing political participation, conscious of their religious motivation in view of the commonweal.

**Agriculture, Environment and Development** Antonio Augusto Rossotto Ioris, Bernardo Mançano Fernandes, 2022-11-21. The Second Edition of this book is completely revised and updated throughout, providing an overview of current challenges faced within the area of Agri-food in relation to policymaking, ecological conservation and socio-environmental justice. Including a range of new chapters, the book explores some of the conceptual and analytical gaps that are presented by current approaches to this topic. The series of interconnected chapters offers a critical reinterpretation of the tensions associated with the failures of mainstream regulatory regimes, land and resource grabbing and the impacts of global agri-food chains at local, regional and inter-sectoral scales. The book also examines past legacies and emerging challenges associated with agriculture modernisation, politico-spatial disputes, climate change, social movements, gender, ethnicity and education. It likewise addresses the transformative potential of different combinations of biophysical, socio-technical and socio-spatial practices of food sovereignty.

**Brazilian Agrarian Social Movements** Rebecca Tarlau, Anthony Pahnke, 2018-02-02. Contradictions between impressive levels of economic growth and the persistence of poverty and inequality are perhaps nowhere more evident than in rural Brazil. While Brazil might appear to be an example of the potential harmony between large-scale export-oriented agribusiness and small-scale family farming, high levels of rural resistance contradict this vision. In this volume, individual contributions from a variety of researchers across the field highlight seven key characteristics of contemporary Brazilian resistance that have broader resonance in the region and beyond: the growth of international networks, the changing structure of state-society collaboration, the deepening of territorial claims, the importance of autonomy, the development of alternative economies, continued opposition to dispossession and struggles over the meaning of nature. By analyzing rural mobilization in Brazil, this collection offers a range of insights relevant to rural contention globally. Each contribution in this title increases our understanding of alternative agricultural production, large-scale development projects, education, race and political parties in the contemporary agrarian context. This book was previously published as a special issue of the *Journal of Peasant Studies*.

*The Poverty of Capitalism* John

Hilary, 2013-10-09 Capitalist growth is widely heralded as the only answer to the crisis still sweeping the global economy Yet the era of corporate globalisation has been defined by unprecedented levels of inequality and environmental degradation A return to capitalist growth threatens to exacerbate these problems not solve them In *The Poverty of Capitalism* John Hilary reveals the true face of transnational capital in its insatiable drive for expansion and accumulation He exposes the myth of corporate social responsibility CSR and highlights key areas of conflict over natural resources labour rights and food sovereignty Hilary also describes the growing popular resistance to corporate power as well as the new social movements seeking to develop alternatives to capitalism itself This book will be essential reading for all those concerned with global justice human rights and equity in the world order     *Anthropology, Theatre, and Development* Alex Flynn, Jonas Tinius, 2015-04-21 The contributors explore diverse contexts of performance to discuss peoples own reflections on political subjectivities governance and development The volume refocuses anthropological engagement with ethics aesthetics and politics to examine the transformative potential of political performance both for individuals and wider collectives
