Big Med David Dranove, Lawton R. Burns, 2024-05-31 There is little debate that health care in the United States is in need of reform But where should those improvements begin With insurers Drug makers The doctors themselves In Big Med David Dranove and Lawton Robert Burns argue that we re overlooking the most ubiquitous cause of our costly and underperforming system megaproviders the expansive health care organizations that have become the face of American medicine Your local hospital is likely part of one Your doctors too And the megaproviders are bad news for your health and your wallet Drawing on decades of combined expertise in health care consolidation Dranove and Burns trace Big Med s emergence in the 1990s followed by its swift rise amid false promises of scale economies and organizational collaboration In the decades since megaproviders have gobbled up market share and turned independent physicians into salaried employees of big bureaucracies while delivering on none of their early promises For patients this means higher costs and lesser care Meanwhile physicians report increasingly low morale making it all but impossible for most systems to implement meaningful reforms In Big Med Dranove and Burns combine their respective skills in economics and management to provide a nuanced explanation of how the provision of health care has been corrupted and submerged under consolidation They offer practical recommendations for improving competition policies that would reform megaproviders to actually achieve the efficiencies and quality improvements they have long promised This is an essential read for understanding the current state of the health care system in America and the steps urgently needed to create an environment of better care for all of us **The Patient**

Will See You Now Eric Topol, 2016-10-25 The essential guide by one of America s leading doctors to how digital technology enables all of us to take charge of our health A trip to the doctor is almost a guarantee of misery You ll make an appointment months in advance You ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes Then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves And your bill will be astronomical In The Patient Will See You Now Eric Topol one of the nation s top physicians shows why medicine does not have to be that way Instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system The change is powered by what Topol calls medicine s Gutenberg moment Much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare With smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best Medicine has been digitized Topol argues now it will be democratized Computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable Massive

open online medicine where diagnostics are done by Facebook like comparisons of medical profiles will enable real time real world research on massive populations There s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy Nevertheless the result better cheaper and more human health care will be worth it Provocative and engrossing *The Patient Will See You Now* is essential reading for anyone who thinks they deserve better health care That is for all of us **Flipping Health Care**
