Cyberfeminism Bisexuality Jane Cyborg:

Cyberfeminism and Bisexuality Jane Cyborg, 2015-12 This is a short essay about cyberfeminism and bisexuality published as a book *Feminist Collections* University of Wisconsin System. Women's Studies Librarian, University of Wisconsin System. Gender & Women's Studies Librarian, 1999 **Radical Philosophy**, 1972 Sociological Theory- Classical Statements Dejerius Burgess, 2019-06-04 The basic insight of sociology is that human behaviour is largely shaped by the groups to which people belong and by the social interaction that takes place within those groups The main focus of sociology is the group not the individual Sociologist is mainly interested in the interaction between people the ways in which people act towards respond to and influence one another Sociology does not however study everything that happens in society or under social conditions Classical Sociological Theory continues to include two historical chapters covering the early history of the field as well as its most recent developments These chapters give students an overview that allows them to put the work of each theorist in its historical social and political context This book offers students a handy overview of most of what they need to know about classical sociological theory **Cybersexualities** Jenny Wolmark, 1999 Cyberspace the cyborg and cyberpunk have given feminists new imaginative possibilities for thinking about embodiment and identity in relation to technology This is the first anthology of the key essays on these potent metaphors Divided into three sections Technology Embodiment and Cyberspace Cybersubjects Cyborgs and Cyberpunks Cyborg Futures the book addresses different aspects of the human technology interface The extensive introduction surveys the ways cyborg and cyberspace metaphors have been used in relation to current critical theory and indicates the context for the specific essays This is an invaluable guide for students studying any aspects of contemporary theory and culture Brings together in a unique collection the work of key authors in feminist and cyber theory Demonstrates the wide range of contemporary critical work Challenges constructions of gender race and class An extensive introduction surveys the ways cyborg and cyberspace metaphors have been used in relation to current critical theory Brief section introductions indicate the context for the specific essays An Analysis of Donna Haraway's A Cyborg Manifesto Rebecca Pohl, 2019-06-26 Haraway's A Cyborg Manifesto is a key postmodern text and is widely taught in many disciplines as one of the first texts to embrace technology from a leftist and feminist perspective using the metaphor of the cyborg to champion socialist postmodern and anti identitarian politics Until Haraway's work few feminists had turned to theorizing science and technology and thus her work quite literally changed the terms of the debate This article continues to be seen as hugely influential in the field of feminism particularly postmodern materialist and scientific strands It is also a precursor to cyberfeminism and posthumanism and perhaps anticipates the development of digital humanities The Gendered Cyborg Fiona Hovenden, Linda Janes, Gill Kirkup, Kathryn Woodward, 2013-09-13 The Gendered Cyborg explores the relationship between representation technoscience and gender through the metaphor of the cyborg The contributors argue that the figure of the cyborg offers ways of thinking about the relationship between culture

and technology people and machines which disrupt the power of science to enforce the categories through which we think about being human male and female Taking inspiration from Donna Haraway's groundbreaking Manifesto for Cyborgs the articles consider how the cyborg has been used in cultural representation from reproductive technology to sci fi and question whether the cyborg is as powerful a symbol as is often claimed The different sections of the reader explore the construction of gender categories through science the interaction of technoscience and gender in contemporary science fiction film such as Blade Runner and the Alien series debates around modern reproductive technology such as ultrasound scans and IVF assessing their benefits and constraints for women issues relating to artificial intelligence and the internet

Cybersexualities Jenny Wolmark, 1992 Cyberspace the cyborg and cyberpunk have given feminists new imaginative possibilities for thinking about embodiment and identity in relation to technology This is the first anthology of the key essays on these potent metaphors

Cyborg Laura Forlano, Danya Glabau, 2024-02-06 A concise introduction to cyborg theory that examines the way in which technology is situated politically and embodied This introduction to cyborg theory provides a critical vantage point for analyzing the claims around emerging technologies like automation robots and AI Cyborg analyzes and reframes popular and scholarly conversations about cyborgs from the perspective of feminist cyborg theory Drawing on their combined decades of training teaching and research in the social sciences design and engineering education Laura Forlano and Danya Glabau introduce an approach called critical cyborg literacy Critical cyborg literacy foregrounds power dynamics and pays attention to the ways that social and cultural factors such as gender race and disability shape how technology is imagined developed used and resisted Forlano and Glabau offer critical cyborg literacy as a way of thinking through questions about the relationship between humanity and technology in areas such as engineering and computing art and design and health care and medicine as well as the social sciences and humanities Cyborg examines whether modern technologies make us all cyborgs if we consider for instance the fact that we use daily technologies at work have technologies embedded into our bodies in health care applications or use technology to critically explore possibilities as artists designers activists and creators Lastly Cyborg offers perspectives from critical race feminist and disability thinkers to help chart a path forward for cyborg theory in the twenty first century

Cyberfeminism Susan Hawthorne, Renate Klein, 1999 This collection explores the possibilities for feminism in cyberspace It also looks at the pitfalls of the medium with theorists examining trafficking of women perception of the body and the problems of global and homogenised culture
