

Task1: Curriculum of Computer Science Department – 3 marks

Your task is to create a knowledge base describing courses and their prerequisites. The graph below shows the courses and their prerequisites.

As shown in the graph, a solid directed arrow from CS15 to CS16 indicates that CS15 is a prerequisite to CS16. A dotted arrow means that ONE of the these courses is a prerequisite of the course. For example, to take CS33, you have to take *either* CS16 *or* CS18. Course names are constants, so you have to use lowercase letters (cs22,cs33, etc) in your code. More facts about the transcript are:

- CS15, CS17, CS33, CS141 and CS126 are only offered in the fall.
- CS16, CS18, CS22, CS32, CS166 are only offered in the spring.

You also have a set of **rules** as follows:

- A course is **introductory** if it's offered in the fall and has no prerequisites, or if it's offered in the spring and its prerequisite that has no prerequisites.
 - A course is **intermediate** if it is not introductory, but its prerequisites are all introductory courses.
 - A course is **upper level** if its prerequisites are not introductory courses, or if its prerequisites are CS22 **and** introductions.
 - Course may only be of one level; i.e., introductory courses may not also be intermediate courses, etc.
- A. Considering the fact, that fall semester is over and Sarah were able to complete 4 courses only and failed in CS33. You should now add a set of facts that students have taken some courses using the `has_taken` predicate (i.e., `has_taken(sarah, cs15)`).
- B. Then, you need to add one more rule to test the eligibility of a student to take a course in the spring: `can_take(Student, Course)`, true when Student is eligible to take Course (i.e., they have taken the necessary prerequisites).
