 Damien Van Puyvelde, Aaron Brantly, 2017-07-20 This volume explores the contemporary challenges to US national
 cybersecurity Taking stock of the field it features contributions by leading experts working at the intersection between
 academia and government and offers a unique overview of some of the latest debates about national cybersecurity These
 contributions showcase the diversity of approaches and issues shaping contemporary understandings of cybersecurity in the
 West such as deterrence and governance cyber intelligence and big data international cooperation and public private
 collaboration The volume's main contribution lies in its effort to settle the field around three main themes exploring the
 international politics concepts and organization of contemporary cybersecurity from a US perspective Related to these
 themes this volume pinpoints three pressing challenges US decision makers and their allies currently face as they attempt to
 govern cyberspace maintaining international order solving conceptual puzzles to harness the modern information

Taiwan Strait Ming-chin Monique Chu, Scott L. Kastner, 2014-11-27 This book presents an interdisciplinary examination of
 cross Taiwan Strait relations and the complex dynamics at play in the region Since the election of Ma Ying jeou as Taiwan's
 president in 2008 the relationship across the Taiwan Strait long viewed as one of Asia's most volatile potential flashpoints
 has experienced a remarkable détente Whether the relationship has been truly transformed however remains an open
 question and the Taiwan Strait remains a central regional and global security issue A return to turbulence in the Taiwan
 Strait could also add a new dimension of instability in the already tense maritime disputes in the East and South China Seas
 While the relationship across the Taiwan Strait remains critically important it is also changing rapidly and the chapters in

this volume present new thinking to help make sense of complex cross Strait dynamics Specifically these essays explore different security and or globalization dimensions of China Taiwan ties as well as the globalization security linkages that have emerged As the balance of power in Asia shifts dramatically several chapters in this volume explore how traditional security forces are evolving At the same time there are new dynamics emerging as a consequence of globalization forces such as the tremendous economic and social integration across the Taiwan Strait and several chapters in this volume consider some of these new problems Finally several chapters consider the often under researched dynamics associated with the globalization security interface such as cyber threats transnational criminal networks and the security spill over impact of production globalization This book will of much interest to students of Chinese Politics Asian Security globalisation diplomacy and International Relations

Confronting an "Axis of Cyber"? Fabio Rugge, 2018-10-24 The new US National Cyber Strategy points to Russia China North Korea and Iran as the main international actors responsible for launching malicious cyber and information warfare campaigns against Western interests and democratic processes Washington made clear its intention of scaling the response to the magnitude of the threat while actively pursuing the goal of an open secure and global Internet The first Report of the ISPI Center on Cybersecurity focuses on the behaviour of these usual suspects investigates the security risks implicit in the mounting international confrontation in cyberspace and highlights the current irreconcilable political cleavage between these four countries and the West in their respective approaches in and around cyberspace
