Computerized Vehicle Routing And Scheduling In Road Transport:

Computerised Vehicle Routing and Scheduling in Road Transport Peter Eibl,1996 Over the past 20 years academics industry commentators and practitioners in the field of physical distribution have been preoccupied with the computational and technical side of computerized vehicle routing and scheduling Comparatively little research has been carried out on the user or management aspects of the technology This study investigates the adoption of CVRS technology Moreover the study evaluates the success of the software used in both a strategic tactical and in an operational role The findings highlight that CVRS technology is used by only a relatively small number of organizations despite being an effective means to improve the efficiency of transport operations and to provide substantial intangible benefits **Efficient Road Transport Scheduling** John Edward Sussams,1971 **Green Logistics** Alan McKinnon,Michael Browne,Anthony Whiteing,2012-12-03 As concern for the environment rises companies must take more account of the external costs of logistics associated mainly with climate change air pollution noise vibration and accidents Green Logistics analyzes the environmental consequences of logistics and how to deal with them Written by a leading team of logistics academics the book examines ways of reducing these externalities and achieving a more sustainable balance between economic environmental and social objectives It examines key areas in this important subject including carbon auditing of supply chains transferring freight to greener transport modes reducing the environmental impact of warehousing improving fuel efficiency in freight transport reverse logistics for the management of waste The new edition is completely updated throughout with new methodologies and case studies to illustrate the impact of green logistics in practice **Decision Support Systems: Experiences and Expectations** T. Jelassi,M.R. Klein,W.M. Mayon-White,2014-06-28 This proceedings volume aims to consolidate current knowledge of research into the many fields of DSS and to identify key issues which should be incorporated into the future research agenda The main themes of this volume include DSS for distributed decision processes Embedding knowledge in DSS and DSS and organizational change **Operational Logistics** Moshe Kress,2015-10-30 This book explores the theoretical foundations and applications of military operational logistics OpLog OpLog theory has two facets qualitative and quantitative The qualitative facet is imbedded in the theory of operational level of war or operational art It includes principles imperatives and tenets which are stated and analyzed in the first few chapters The quantitative facet relates to the scientific aspects of OpLog It is manifested by formal network models representing structural and operational features of an OpLog system The book examines the two facets and integrates them into a unified presentation Important OpLog applications are re described and discussed Chapter 1 presents a general introduction to military logistics Chapter 2 discusses the px font family monospace general structure and characteristics of logistics and describes its three levels strategic operational and tactical Chapter 3 describes the foundation of OpLog Chapter 4 deals with OpLog planning Chapter 5 addresses the issue of logistic information and Chapter 6 deals with forecasting logistic demands Chapters 7 and 8

are new additions to this second edition They address logistics aspects of two contemporary operational topics insurgencies and humanitarian assistance Chapter 9 describes the first version of the logistic network model Chapter 10 addresses an important OpLog characteristic Flexibility Chapter 11 discusses two major challenges in OpLog practice force accumulation 4419px font family monospace and medical treatment and evacuation Chapter 12 presents an inter temporal network optimization model designed to determine deployment and employment of 3333px font family monospace the OpLog support chain during military operations

Green Logistics Prof Alan McKinnon, Dr Sharon Cullinane, Dr Anthony Whiteing, Professor Michael Browne, 2010-03-03 The main objective of logistics is to co ordinate the movement of products through the supply chain in a way that meets customer requirements at minimum cost In the past this cost has been defined in purely monetary terms As concern for the environment rises companies must take more account of the external costs of logistics associated mainly with climate change air pollution noise vibration and accidents Green Logistics analyses the environmental consequences of logistics and how to deal with them Written by a leading team of logistics academics the book examines ways of reducing these externalities and achieving a more sustainable balance between economic environmental and social objectives

Handbook on Decision Making Chee Peng Lim, 2010-09-07 Decision making arises when we wish to select the best possible course of action from a set of alternatives With advancements of the digital technologies it is easy and almost instantaneous to gather a large volume of information and or data pertaining to a problem that we want to solve For instance the world wi web is perhaps the primary source of information and or data that we often turn to when we face a decision making problem However the information and or data that we obtain from the real world often are complex and comprise various kinds of noise Besides real world information and or data often are incomplete and ambiguous owing to uncertainties of the environments All these make decision making a challenging task To cope with the challenges of decision making searchers have designed and developed a variety of decision support systems to provide assistance in human decision making processes The main aim of this book is to provide a small collection of techniques stemmed from artificial intelligence as well as other complementary methodo gies that are useful for the design and development of intelligent decision support systems Application examples of how these intelligent decision support systems can be utilized to help tackle a variety of real world problems in different mains e g business management manufacturing transportation and food ind tries and biomedicine are also presented A total of twenty chapters which can be broadly divided into two parts i e

Decarbonizing Logistics Alan McKinnon, 2018-06-03 Logistics accounts for around 9 10% of global CO2 emissions and will be one of the hardest economic sectors to decarbonize This is partly because the demand for freight transport is expected to rise sharply over the next few decades but also because it relies very heavily on fossil fuel Decarbonizing Logistics outlines the nature and extent of the challenge we face in trying to achieve deep reductions in greenhouse gas emissions from logistical activities It makes a detailed assessment of the available options

including restructuring supply chains shifting freight to lower carbon transport modes and transforming energy use in the logistics sector The options are examined from technological and managerial standpoints for all the main freight transport modes Based on an up to date review of almost 600 publications and containing new analytical frameworks and research results Decarbonizing Logistics is the first to provide a global multi disciplinary perspective on the subject It is written by one of the foremost specialists in the field who has spent many years researching the links between logistics and climate change and been an adviser to governments international organizations and companies on the topic
