Climate Change And Displacement Reader:

Climate Change and Displacement Reader Ezekiel Simperingham, Jordan Bakker, 2012 This compilation brings together fifty two of the leading texts on climate change and displacement It provides a consolidated source and substantive overview of the key issues relating to climate change and displacement including the reality of climate displacement the shape of current and proposed international law on this matter the institutional and governance framework that will address and respond to this crisis and an analysis of what a cross section of governments and civil society organizations are already doing to prepare for and act against climate displacement De Gruyter Handbook of Climate Migration and Climate Mobility

Justice Andreas Neef, Natasha Pauli, Bukola Salami, 2024-09-23 Accelerating climate change is widely predicted to have profound impacts on human mobility over the coming decades Climate mobilities and immobilities invoke issues of justice and social inequality and pose numerous socio cultural health economic legal and political challenges Current international legal frameworks and national governance mechanisms provide insufficient protection for people displaced by climate change who are often subjected to health risks psychosocial trauma human rights abuse and even new climatic risks At the same time there is a need to better understand how climate change interacts with other mobility drivers and why many climate affected people decide to stay put or remain trapped in at risk locations Drawing on a wide range of disciplinary traditions and featuring Indigenous voices and youth perspectives this book introduces new conceptual frameworks and empirical studies to examine the unique challenges facing people on the move and those staying behind **Catholicism in Migration and Diaspora** Gemma Tulud Cruz, 2022-07-28 This book focuses on the Philippines as a powerhouse in the Catholic and global migration landscape It offers a wide ranging look at the roles dynamics character and trajectories of Catholic faith and practice in the age of migration through an interdisciplinary religious and theological approach to Filipino Catholics experience of migration and diaspora both at home and overseas In so doing the book introduces the reader to the hallmarks and characteristics of a contextual model of world Christianity and global Catholicism in the twenty first century

Routledge Handbook of Climate Justice Tahseen Jafry, 2018-11-01 The term climate justice began to gain traction in the late 1990s following a wide range of activities by social and environmental justice movements that emerged in response to the operations of the fossil fuel industry and later to what their members saw as the failed global climate governance model that became so transparent at COP15 in Copenhagen The term continues to gain momentum in discussions around sustainable development climate change mitigation and adaptation and has been slowly making its way into the world of international and national policy However the connections between these remain unestablished Addressing the need for a comprehensive and integrated reference compendium The Routledge Handbook of Climate Justice provides students academics and professionals with a valuable insight into this fast growing field Drawing together a multidisciplinary range of authors from the Global North and South this Handbook addresses some of the most salient topics in current climate justice

research including just transition urban climate justice and public engagement in addition to the field's more traditional focus on gender international governance and climate ethics With an emphasis on facilitating learning based on cutting edge specialised climate justice research and application each chapter draws from the most recent sources real world best practices and tutored reflections on the strategic dimensions of climate justice and its related disciplines The Routledge Handbook of Climate Justice will be essential reading for students and scholars as well as being a vital reference tool for those practically engaged in the field

Routledge International Handbook of Migration Studies Steven J. Gold, Stephanie J. Migration and Conflict in a Global Warming Era Silja Klepp, Christiane Fröhlich, 2020-11-18 This Special Issue explores underrepresented aspects of the political dimensions of global warming It includes post and decolonial perspectives on climate related migration and conflict intersectional approaches and climate change politics as a new tool of governance Its aim is to shed light on the social phenomena associated with anthropogenic climate change as well as its multidimensional and far reaching political effects including climate induced migration movements and climate related conflicts in different parts of the world In doing so it critically engages with securitizing discourses and the resulting anti migration arguments and policies in the Global North in order to identify and give a voice to alternative and hitherto underrepresented research and policy perspectives In this way it aims to contribute to a fact based critical and holistic approach to human mobility and conflict in the context of political and environmental crisis

Local Activism for Global Climate Justice Patricia E. Perkins, 2019-09-06 This book will inspire and spark grassroots action to address the inequitable impacts of climate change by showing how this can be tackled and the many benefits of doing so With contributions from climate activists and engaged young authors this volume explores the many ways in which people are proactively working to advance climate justice The book pays special attention to Canada and

the Great Lakes watershed showing how the effects of climate change span local regional and global scales through the impact of extreme weather events such as floods and droughts with related economic and social effects that cross political jurisdictions Examining examples of local level activism that include organizing for climate resilient and equitable communities the dynamic leadership of Indigenous peoples especially women for water and land protection and diaspora networking Local Activism for Global Climate Justice also provides theoretical perspectives on how individual action relates to broader social and political processes Showcasing a diverse range of inspirational and thought provoking case studies this book will be of great interest to students and scholars of climate justice climate change policy climate ethics and global environmental governance as well as teachers and climate activists

Immigration Control in a Warming World

Johannes Graf Keyserlingk, 2018-08-07 In the course of the twenty first century climate change is projected to significantly increase the already weighty immigration pressures that rich countries in Europe and North America face Estimates vary greatly from 50 to 500 million further migrants until 2050 most of them from developing countries that have contributed little to global warming Meanwhile the willingness of citizens in destination countries to let further foreigners immigrate is unlikely to keep pace with that increase In fact the concern with climate migration is a blurry intricate and pressing one that will turn out to challenge current political and philosophical frameworks It is a blurry one because it will often be impossible to tell whether or to what extent it really was the changing climate that triggered a particular migratory flow rather than say economic social or demographic factors that often interact with the climatic trigger It is an intricate one because although it appears that heavily emitting countries have a particularly strong responsibility toward climate migrants there is little doubt that in times of rising anti immigrant sentiment that moral responsibility cannot be addressed by simply calling for more open borders And it is a pressing one because this latter insight neither absolves us from our obligations toward climate migrants nor will it keep them from moving Immigration Control in a Warming World aims to address these concerns and discusses potential future solutions to the issue of climate migration That such morally appropriate solutions are hardly in sight in today s practice of international politics is a poignant realization and it serves as a starting point for this book s trenchant critique of political inaction and of some philosophical commentators more idealistic perspectives on migration in the 21st Century

People on the Move in a Changing Climate Etienne Piguet, Frank Laczko, 2013-10-17 Policymakers around the world are increasingly concerned about the likely impact of climate change and environmental degradation on the movement of people This book takes a hard look at the existing evidence available to policymakers in different regions of the world How much do we really know about the impact of environmental change on migration How will different regions of the world be affected in the future Is there evidence to show that migration can help countries adapt to environmental change What types of research have been conducted how reliable is the evidence These are some of the questions considered in this book which presents for the first time a synthesis of relevant research findings for each major region of the world Written by

regional experts the book provides a comprehensive overview of the key findings of existing studies on the linkages between environmental change and the movement of people More and more reports on migration and the environment are being published but the information is often scattered between countries and within regions and it is not always clear how much of this information is based on solid research This book brings this evidence together for the first time highlighting innovative studies and research gaps In doing this the book seeks to help decision makers draw lessons from existing studies and to identify priorities for further research

Managing Climate Change Adaptation in the Pacific Region Walter Leal Filho, 2020-03-03 This book presents papers written by scholars practitioners and members of social movements and government agencies pursuing research and or climate change projects in the Pacific region Climate change is impacting the Pacific in various ways including numerous negative effects on the natural environment and biodiversity As such a better understanding of how climate change affects Pacific communities is required in order to identify processes methods and tools that can help countries and the communities in the region to adapt and become more resilient Further the book showcases successful examples of how to cope with the social economic and political problems posed by climate change in the region
