Connecting With Companies A Guide To Consulting Agreements For Biomedical Scientists:

Connecting with Companies Edward Klees, H. Robert Horvitz, 2014 Academic scientists often find it challenging to negotiate consulting agreements with biotechnology or pharmaceutical companies. The legal language can be confusing, anxieties can occur on both sides, specifics concerning stock shares and options can be obscure, and there are pitfalls aplenty. Yet raising objections or making counterproposals may feel awkward and potentially risky. This book is an essential guide for academic scientists and physicians considering consulting work in biomedicine. The authors, a seasoned attorney and a Nobel Prize winning scientist, have extensive experience in reviewing and negotiating consulting agreements. In an accessible style, they guide scientists through key contractual issues including intellectual property management, confidentiality fees, indemnity, and stock options, as well as the laws such agreements must satisfy. As the science of biomedicine continues to skyrocket, biomedical consulting has become an attractive option for a wider range of career stages. This is the most authoritative and practically useful handbook available to any scientist considering this important step in career advancement.

Biomedical Consulting Agreements Edward Klees, H. Robert Horvitz, 2012-09-14 An attorney and a scientist outline issues that arise in biomedical consulting agreements, including institutional obligations, confidentiality, consulting fees, stock, and options. There can be a clash of cultures when academic scientists negotiate consulting agreements with biotechnology or pharmaceutical companies. Scientists accustomed to the collegial atmosphere of the laboratory and sometimes disdainful of legal paperwork might be less than diligent in reading the fine print. On the other hand, a company motivated to protect discoveries and trade secrets might write provisions that are favorable to its interests, leaving it to the scientist to raise objections or offer a counterproposal. The scientist meanwhile might believe that it would be impolite or antagonistic to raise questions about a company's agreement. This book offers an essential guide for academic scientists and physicians who are considering consulting work in the field of biomedicine. In it, the authors, an attorney and a Nobel Laureate in Medicine, both with extensive experience reviewing and negotiating consulting agreements, outline key issues to consider before signing a consulting agreement. These issues range from the obvious: intellectual property, confidentiality, and fees, to those that might not spring immediately to mind, including indemnity, different classes of stock, and the relevance of insider trading and securities laws.
