Demography for Planning and Policy: Australian Case Studies Tom Wilson, Elin Charles-Edwards, Martin Bell, 2015-11-25

This edited collection shows how demographic analysis plays a pivotal role in planning policy and funding decisions in Australia. Drawing on the latest demographic data and methods, these case studies in applied demography demonstrate that population dynamics underpin the full spectrum of contemporary social, economic and political issues. The contributors harness a range of demographic statistics and develop innovative techniques demonstrating how population dynamics influence issues such as electoral representation, the distribution of government funding, metropolitan and local planning, the provision of aged housing, rural depopulation, coastal growth, ethnic diversity and the well-being of Australia's Indigenous community. Moving beyond simple statistics, the case studies show that demographic methods and models offer crucial insights into contemporary problems and provide essential perspectives to aid efficiency, equity in public policy and private sector planning. Together, the volume represents essential reading for students across the social sciences as well as for policy makers in government and private industry. *Routledge Handbook of Asian Demography* Zhongwei Zhao, Adrian C.

Hayes, 2017-12-14 Home to close to 60 per cent of the world's population, Asia is the largest and by far the most populous continent. It is also extremely diverse: physically and culturally, Asian countries and regions have their own distinctive histories, cultural traditions, religious beliefs and political systems, and they have often pursued different routes to development. Asian populations also present a striking array of demographic characteristics and stages of demographic transition. This handbook is the first to provide a comprehensive study of population change across the whole of Asia. Comprising 28 chapters by more than 40 international experts, this handbook examines demographic transitions on the continent, their considerable variations, their causes and consequences, and their relationships with a wide range of social, economic, political and cultural processes. Major topics covered include population studies and sources of demographic data, historical demography, family planning and fertility decline, sex preferences, mortality changes, causes of death, HIV/AIDS, population distribution and migration, urbanization, marriage and family, human capital and labour force, population ageing, demographic dividends, political demography, population and environment, and Asia's demographic future. This handbook provides an authoritative and comprehensive reference for researchers, policymakers, academics, students and anyone who is interested in population change in Asia and the world. **The Routledge Handbook of Australian Urban and Regional Planning** Neil Sipe, Karen Vella, 2017-08-25

Where is planning in twenty-first century Australia? What are the key challenges that confront planning? What does planning scholarship reveal about the state of planning practice in meeting the needs of urban and regional Australians? The *Routledge Handbook of Australian Urban and Regional Planning* includes 27 chapters that answer these and many other questions that confront planners working in urban and regional areas in twenty-first century Australia. It provides a single source for cutting-edge thinking and research across a broad range of the most

important topics in urban and regional planning Divided into six parts this handbook explores contexts of urban and regional planning in Australia critical debates in Australian planning planning policy climate change disaster risk and environmental management engaging and taking planning action planning education and research This handbook is a valuable resource for advanced undergraduate and postgraduate students in urban planning built environment urban studies and public policy as well as academics and practitioners across Australia and internationally

*APAIS 1999: Australian public affairs information service , The Transformation of Australia's Population Siew-An Khoo,Peter Francis McDonald,Siew-Ean Khoo,2003 Transformation of Australia s population 1970 2030 **Regional Cities and City Regions in Rural Australia** Peter John Smailes,Trevor Louis Charles Griffin,Neil Michael Argent,2018-07-16 The book examines the extent to which the sustained population growth of Australia s heartland regional centres has come at the expense of demographic decline in their own hinterlands and ultimately of their entire regions It presents a longitudinal study over the period 1947 2011 of the extensive functional regions centred on six rapidly growing non metropolitan cities in south eastern Australia emphasising rapid change since 1981 The selected cities are dominantly service centres in either inland or remote coastal agricultural settings The book shows how intensified age specific migration and structural ageing arising from macro economic reforms in the 1980s fundamentally changed the economic and demographic landscapes of the case study regions It traces the demographic consequences of the change from a relative balance between central city minor urban centres and dispersed rural population within each functional region in 1947 to one of extreme central city dominance by 2011 and examines the long term implications of these changes for regional policy The book constitutes the first in depth longitudinal study over the entire post WWII period of a varied group of Australian regional cities and their hinterlands defined in terms of functional regions It employs a novel set of indices which combine numerical and visual expression to measure the structural ageing process *APAIS 1994: Australian public affairs information service , Australian national bibliography ,1961 **APAIS 1992: Australian public affairs information service , Perspectives on Development and Population Growth in the Third World** O.G. Simmons,2012-12-06 Until the early to mid 1970s social scientists in the fields of population and development were largely going their own ways Demographers relied almost exclusively on demographic transition theory as their para digm for understanding the role of development in population change and fertility decline Conversely most development economists and other specialists were certainly aware of the constraints placed upon development objectives by population growth However the main de velopment theories paid little attention to population and the implica tions of population growth for development Indeed it was not until after the World Population Conference in Bucharest in 1974 that the interaction of population and development became a serious and pur positive theme for social scientific study Accordingly since about the mid 1970s an extensive literature in the field of population and develop ment has been generated And in 1975 under the auspices of The Popu lation Council the journal Population and Development Review was found ed a journal**

which in the past decade has developed into the premier publication in the world for work in this area But our understanding of development as it refers to change in Third World countries remained fragmented Moreover our understanding of the linkages and interactions between population and development was very limited It is in this regard that Ozzie Simmons's Perspectives on Development and Population Growth in the Third World will certainly have an impact
