Consciousness David Rose, 2006-02-02 Consciousness is a state of being aware of our self of our surroundings of our place in those surroundings What neural processes drive our awareness and how do these processes relate to what we think of as our mind David Rose seeks to respond to these questions taking a critical approach *Consciousness* Andrea Eugenio Cavanna, Andrea Nani, 2014-09-30 This book reviews some of the most important scientific and philosophical theories concerning the nature of mind and consciousness Current theories on the mind body problem and the neural correlates of consciousness are presented through a series of biographical sketches of the most influential thinkers across the fields of philosophy of mind psychology and neuroscience The book is divided into two parts the first is dedicated to philosophers of mind and the second to neuroscientists experimental psychologists Each part comprises twenty short chapters with each chapter being dedicated to one author A brief introduction is given on his or her life and most important works and influences The most influential theories developed by each author are then carefully explained and examined with the aim of scrutinizing the strengths and weaknesses of the different approaches to the nature of consciousness **Understanding Consciousness** Max Velmans, 2009-03-26 Building on the widely praised first edition this book provides a unique survey and evaluation of consciousness studies along with an original analysis of consciousness that combines scientific findings philosophy and common sense **Consciousness: Oxford Bibliographies Online Research Guide** Oxford University Press, 2010-06-01 This ebook is a selective guide designed to help scholars and students of social work find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books chapters and journal articles to online archives electronic data sets and blogs Written by a leading international authority on the subject the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related This ebook is a static version of an article from Oxford Bibliographies Online Philosophy a dynamic continuously updated online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study Philosophy Oxford Bibliographies Online covers most subject disciplines within the social science and humanities for more information visit www.oxfordbibliographies.com *EBOOK: Cognitive Psychology 2e* Kenneth Gilhooly, Fiona Lyddy, Frank Pollick, Sandra Buratti, 2020-12-22 *EBOOK Cognitive Psychology 2e* *The Electromagnetic Fields of Consciousness* J. Miller, 2015-06-15 Philosophers of mind have been arguing for decades about the nature of phenomenal consciousness and the relation between brain and mind More recently neuroscientists and philosophers of science have entered the discussion Which neural activities in the brain constitute phenomenal consciousness and how could science distinguish the neural correlates of consciousness from its neural constitution At what level of neural activity is consciousness constituted in the brain and what might be learned from well studied phenomena like binocular rivalry attention memory affect pain dreams and coma What should the science of consciousness want to know and what should explanation look like in this field How should the constitution relation be applied to brain and mind and are other relations

like identity supervenience realization emergence and causation preferable Building on a companion volume on the constitution of visual consciousness AiCR 90 this volume addresses these questions and related empirical and conceptual territory It brings together for the first time scientists and philosophers to discuss this engaging interdisciplinary topic
