Medford,2018-07-20 This book reflects the changes in technology and educational trends cross disciplinary learning entrepreneurship first year learning programs critical writing requirements course assessment among others that have pushed theatre educators to innovate question and experiment with new teaching strategies The text focuses upon a firm practice based approach that also reflects research in the field offering innovative and proven methods that theatre educators may use to actively engage students and encourage student success The sixteen essays in this volume are divided into five sections Teaching with Digital Technology Teaching in Response to Educational Trends Teaching New Directions in Performance Teaching Beyond the Traditional and Teaching Collaboratively or Across Disciplines Study of this book will provoke readers to question both teaching methods and curricula as they consider the ever shifting arts landscape and the potential careers for theatre graduates **Academic Integrity and the Role of the Academic Library** Josh Seeland,Jason Openo,2024-09-01 This book presents the growing interconnection of two pillars from the world s higher education institutions academic integrity and libraries It provides sound examples to extant questions and conversations about whose job it is to teach academic integrity and what library work is The role of libraries in supporting academic

integrity is not always clear and has not been fully explored Drawing from library literature and that of academic integrity more broadly readers are exposed to how libraries are necessary in a holistic approach to academic integrity Education about academic integrity and the prevention of academic misconduct for not only students but other institutional stakeholders are demonstrated as occurring optimally in positive supportive and proactive ways The book details numerous ways in which librarians can work with faculty and other stakeholders using established frameworks such as information literacy and blended librarianship as well as innovative platforms and content Other contributions involve the identification of potential academic misconduct and administration of academic integrity policies to complete the cycle recommended by the frameworks of global educational quality organizations QAA TEQSA Initiatives presented in the book include those at the course level and institution wide initiatives involving curriculum policy and supports for faculty and students Also contained are efforts occurring at a national level within professional networks in addition to international library curriculum This book provides inspiration to institutions and academic libraries of any size and scope to embrace this emerging role in creating cultures of academic integrity

Teaching Undergraduate Science Linda C. Hodges, 2023-07-03 This book is written for all science or engineering faculty who have ever found themselves baffled and frustrated by their undergraduate students lack of engagement and learning The author an experienced scientist faculty member and educational consultant addresses these issues with the knowledge of faculty interests constraints and day to day concerns in mind Drawing from the research on learning she offers faculty new ways to think about the struggles their science students face She then provides a range of evidence based teaching strategies that can make the time faculty spend in the classroom more productive and satisfying Linda Hodges reviews the various learning problems endemic to teaching science explains why they are so common and persistent and presents a digest of key ideas and strategies to address them based on the research she has undertaken into the literature on the cognitive sciences and education Recognizing that faculty have different views about teaching different comfort levels with alternative teaching approaches and are often pressed for time Linda Hodges takes these constraints into account by first offering a framework for thinking purposefully about course design and teaching choices and then providing a range of strategies to address very specific teaching barriers whether it be students motivation engagement in class ability to problem solve their reading comprehension or laboratory research or writing skills Except for the first and last chapters the other chapters in this book stand on their own i e can be read in any order and address a specific challenge students have in learning and doing science Each chapter summarizes the research explaining why students struggle and concludes by offering several teaching options categorized by how easy or difficult they are to implement Some for example can work in a large lecture class without a great expenditure of time others may require more preparation and a more adventurous approach to teaching Each strategy is accompanied by a table categorizing its likely impact how much time it will take in class or out and how difficult it will be to implement Like scientific research teaching works best when faculty start with a

goal in mind plan an approach building on the literature use well tested methodologies and analyze results for future trials Linda Hodges message is that with such intentional thought and a bit of effort faculty can succeed in helping many more students gain exciting new skills and abilities whether those students are potential scientists or physicians or entrepreneurs Her book serves as a mini compendium of current research as well as a protocol manual a readily accessible guide to the literature the best practices known to date and a framework for thinking about teaching
