Encyclopedia of Production and Manufacturing Management Paul M. Swamidass, 2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field

Systems for Manufacturing Excellence Nick Rich, Mohamed Afy Shararah, 2020-01-03 Many production managers have de stocked excessively large inventories gone lean experimented with continuous improvement processes and introduced new working practices These interventions have largely failed Businesses have also failed to invest in the workforce that

undertakes improvements This means that cash flow stops quickly stocks are depleted to zero and customers lose confidence Systems for Manufacturing Excellence looks at how people and technology work effectively together to generate high performance manufacturing and service operations Not everyone is a Toyota but that does not mean we cannot learn from such businesses The book will present a logic variety of approaches and methods that underpin the different models of high performance used by world class businesses The authors use examples from their training with Toyota work with Tesco and many world class manufacturing businesses that form their research agenda The book will help teams run each part of their production process for effectiveness and efficiency with a high level of discipline that supports excellence in performance
