Communication And Professional Relationships In Healthcare Practice:

Communication and Professional Relationships in Healthcare Practice Sally Candlin, Peter Roger, 2013

Communication and Professional Relationships in Healthcare Practice focuses on the crucial role that spoken interactions play in shaping relationships in contemporary healthcare practice. The authors apply theoretical concepts of communication to the workplace of healthcare drawing upon scenarios based in the settings of clinical experience. The book presents a wide range of interactions including consultations, team meetings, dialogues and casual conversations between health professionals, their colleagues and their clients or patients in a variety of settings. Drawing on the latest research in applied linguistics and professional communication, the authors introduce readers to a number of approaches that can be used to analyse these interactions. Using these techniques, readers will discover exactly how central themes of healthcare practice including trust, empathy, expertise and breaking bad news are constructed through the communicative choices that participants make in these interactions. Designed specifically for medical nursing and allied health practitioners with an interest in communication, the book makes the techniques of discourse analysis accessible and provides ample opportunities for individual practitioners to apply this knowledge to their own professional contexts. Reviews Refreshingly, the book addresses communication not only in interactions between health professionals and patients but amongst team members and between health professionals in an array of communicatively challenging real world contexts. It brings home to the reader the complexity of communication in health care and it offers practitioners many tools for reflecting on their own and others' communicative practices and for enhancing their professional interactions. Dr Catherine O Grady, Educator and Applied Linguist, Health Communication.

The Routledge Handbook of Language and Health Communication Heidi Hamilton, Wen-ying Sylvia Chou, 2014-04-16 The Routledge Handbook of Language and Health Communication consists of forty chapters that provide a broad, comprehensive and systematic overview of the role that linguistics plays within health communication research and its applications. The Handbook is divided into three sections: Individuals, everyday health communication; Health professionals' communicative practices; Patient-provider communication in interaction. Special attention is given to cross-cutting themes including the role of technology in health communication, narrative and observations of authentic, naturally occurring contexts. The chapters are written by international authorities representing a wide range of perspectives and approaches. Building on established work with cutting-edge studies on the changing health communication landscape, this volume will be an essential reference for all those involved in health communication and applied linguistics research and practice.

The Discourse of Nurse-Patient Interactions Shelley Staples, 2015-12-15 The Discourse of Nurse-Patient Interactions: Contrasting the communicative styles of U.S. and international nurses is the first book to quantitatively examine a wide range of linguistic features in a corpus of interactions between nurses and standardized patients. The main goal of this book is to compare the discourse of U.S. L1 English-speaking and international L2 English-speaking nurses. The research design relies on a mixed-method approach.

including both quantitative and qualitative discourse analysis of lexico grammatical interactional prosodic fluency and non verbal features assessments of interactional effectiveness and qualitative interviews with nurses The book offers a detailed description of the situational characteristics of the interactions and compares the discourse of nurses and patients in order to contextualize differences in the communicative styles of the two nurse groups The results provide new insight into the way that sociocultural and linguistic aspects of nurse discourse contribute to the delivery of patient centered care Psychology for health professionals Patricia Barkway,2013-05-15 This fully updated second edition is written specifically for health science and nursing students in Australia and New Zealand Authored by the highly regarded Patricia Barkway with a diverse range of expert contributors this Elsevier e book interprets psychology for nurses as well as for students of paramedicine occupational therapy physiotherapy public health pharmacy psychology social work and midwifery Psychology for Health Professionals 2e e book examines essential psychological theories placing them within a social context Acknowledging increasing awareness that behaviour is influenced as much by external factors as biological and psychological ones the book s first half outlines psychological lifespan and social theories then applies them to contemporary health issues in later chapters A key focus of this leading psychology e book is examining individual personality and psychological theory within the social context of people s lives New content includes current evidence based research references and clinical examples relevant to interdisciplinary contemporary healthcare practice Issues of cultural safety and awareness have been strengthened throughout there is a new section on chronic illness and a focus on recovery This introductory psychology e book does not assume its readers will have prior psychology knowledge yet it can easily be used well beyond first year university Critical thinking questions Classroom activities Research focus boxes providing examples of current research and evidence based practice Interdisciplinary case studies throughout Further resources and web links to provide further reading and research and up to date information data and statistics **Communicating Risk** Jonathan Crichton,Christopher N. Candlin,Arthur S. Firkins,2016-01-05 We live in world increasingly shaped by risk a fact underscored by recent events in the financial markets science and technology environmental policy and biosecurity law enforcement and criminal justice Risk assessment has become a central concern of governments organisations and the professions and the communication of risk is a crucial part of professional work Exploring how risk is discursively constructed across these domains is therefore central to our understanding of how professional practice affects people s lives Communicating Risk takes up this challenge with contributions from leading researchers and practitioners that examine key issues of risk communication across diverse professional domains **Communication Skills for the Health Care Professional: Concepts, Practice, and Evidence** Gwen Van Servellen,2009-10-07 The first text of its kind to address the connection between communication practices and quality patient care outcomes provides future and practicing patient caregivers basic communication knowledge and skills Applying Linguistics in Health Research, Education, and Policy Brett A. Diaz,Robert W. Schrauf,2022-11-07 Researchers

in applied linguistics have found medical and health contexts to be fertile grounds for study from macro levels of conceptual analyses to micro levels of the turn by turn. The rich array of health contexts include medical research itself, clinical encounters, medical education and training, caregivers and patients in everyday life from the formal and ritualized to the ad hoc and ephemeral. This volume foregrounds the crucial role of applied linguists addressing real world problems while simultaneously highlighting the varied ways that health can be understood as a rich site of language inquiry in its own right. Chapters cover a range of health topics including medical training, medical interaction, disability in education, health policy analysis and recommendations, multidisciplinary research teams and medical ethics. While reporting and reflecting on their specific topics in clinical and health contexts, contributors also articulate their own hybrid identities as professional collaborators in health research, education and policy.
