Community-based Water Law and Water Resource Management Reform in Developing Countries Barbara C. P. Koppen, Mark Giordano, John Butterworth, 2007 The lack of sufficient access to clean water is a common problem faced by communities efforts to alleviate poverty and gender inequality and improve economic growth in developing countries While reforms have been implemented to manage water resources these have taken little notice of how people use and manage their water and have had limited effect at the ground level On the other hand regulations developed within communities are livelihood oriented and provide incentives for collective action but they can also be hierarchical enforcing power and gender inequalities This book shows how bringing together the strengths of community based laws rooted in user participation and the formalized legal systems of the public sector water management regimes will be more able to reach their goals

Community Based Water Management and Social Capital Kiyoshi

Kobayashi, Ismu Rini Dwi Ari, Isabel C. Escobar, Andrea Schaefer, 2014-04-14 Community Based Water Management and Social Capital provides scientific understanding of community based water management and how to secure responsible management to satisfy quality and quantity requirements. It shows how community based water management can be synchronized with public water service by introducing the most recent field experiments and theoretical studies in economics, social science, engineering and regional planning which include game theory, microeconomics, econometric statistics, social network analysis, social choice and micro finance. Community Based Water Management and Social Capital presents field experiments and theoretical studies in economics, social science, engineering and regional planning to investigate important questions: what motivates people to involve in voluntary water management? what is the effect of participatory approach in water management? how does social capital work in the voluntary actions? what are key factors for effective governance for water management with diverse actors: local people, enterprise and government? what is necessary for proper water allocation? vi how to synchronize public water service with community based water management. The book provides students, researchers, practitioners and governments with a comprehensive account of the current situation and perspectives on voluntary water management. It delivers a new scientific understanding on sustainable water management schemes and appropriate institutional social structures to secure inalienable rights to access to water. Author: Kiyoshi Kobayashi, Kyoto University, Japan; Ibnu Syabri, Institute of Technology Bandung, Indonesia; Ismu Rini Dwi Ari, Brawijaya University, East Java; Hayeong Jeong, Isabel C. Escobar, Andrea Schaefer. *Leading Issues in Competition, Regulation, and Development* Paul Cook, 2004-01-01. The promotion of liberalized and deregulated markets by bilateral and multilateral aid donors and by global institutions such as the WTO has led to significant attention being paid to competition and regulatory reforms in developing economies. The process of reform involves the transfer and diffusion of market models derived from practice and theory in developed countries. However, in developing countries, regulation needs to do more than simply promote competitiveness and consumer interests; it also needs to ensure that the market nurtures development. By rigorously examining the numerous impacts of regulation, this book will help to fill a significant gap in the literature on economic and social development. The book, now available in paperback, draws together contributions from leading experts across a range of disciplines including economics, law, politics and governance, public management and business management. The authors begin with an extensive overview of the issues of regulation and competition in developing countries and carefully illustrate the important themes and concepts involved. Using a variety of country and sector case studies, they move on to focus on the problems of applicability and adaptation that are experienced in the process of transferring best practice policy models from developed to developing countries. The book presents a clear agenda for further empirical research and is notable for its rigorous exploration of the links between theory and practice. Although there is substantial interest in competition and regulation, as yet there has been relatively little investigation of these issues in developing economies. This book redresses the balance and will be a valuable
