Digital Handmade Craftsmanship And The New Industrial Revolution:

Digital Handmade Lucy Johnston, 2017 Speed regulation and mass production defined the first Industrial Revolution but we have entered a new era Today's revolution has been driven by digital technologies and tools giving rise to entirely new working methods skill sets and consumer products Spearheading this movement is a new generation of creatives who fuse the precision and flexibility of computing and digital fabrication with the skill and tactility of the master artisan to create unexpected and desirable objects and products For the first time on a global scale Digital Handmade selects a group of 80 pioneering designers artists and craftsmen who represent the best of this new trend Profiles of each artisan's techniques are featured alongside the objects they produce each conceived and made through a multifaceted process of hand and digital means and unique to its maker Examples range from the affordable and obtainable to the extraordinary and priceless

Welcome to the next industrial revolution **Digital Handmade** Lucy Johnston, 2015 While the industrial revolution of the nineteenth century diminished the role of the craftsperson in the manufacturing process the digital revolution has had a less devastating effect Today's digital technologies have given rise to entirely new working methods skill sets and consumer products that don't eliminate but enrich traditional hand techniques Digital Handmade presents eighty international designers artists and craftsmen who combine the precision and flexibility of computing and digital fabrication with the skill and tactility of the master artisan to create unexpected and desirable objects and products These pioneers include Louise Lemieux B rub a Canadian artist whose work integrates photography and weaving Australian jewelry designer Cinnamon Lee whose designs explore the relationship between hand and machine and Japanese artists Nendo who produce ceramic pieces that employ both digital fabrication and ancient traditional methods

The Sculptural in the (Post-)Digital Age Mara-Johanna Kölmel, Ursula Ströbele, 2023-06-19 Digital technologies have profoundly impacted the arts and expanded the field of sculpture since the 1950s Art history however continues to pay little attention to sculptural works that are conceived and materialized using digital technologies How can we rethink the artistic medium in relation to our technological present and its historical precursors A number of theoretical approaches discuss the implications of the so called Aesthetics of the Digital referring above all to screen based phenomena For the first time this publication brings together international and trans historical research perspectives to explore how digital technologies re configure the understanding of sculpture and the sculptural leading into the post digital age Up to date research on digital technologies expansion of the concept of sculpture Linking historical sculptural debates with discourse on the new media and post digital culture *Metamodernism* Robin van den Akker, Alison Gibbons,, Timotheus Vermeulen, 2017-11-29 Metamodernism Historicity Affect Depth brings together many of the most influential voices in the scholarly and critical debate about post postmodernism and twenty first century aesthetics arts and culture By relating cutting edge analyses of contemporary literature the visual arts and film and television to recent social technological and economic developments the volume provides both a map and an itinerary of today's

metamodern cultural landscape As its organising principle the book takes Fredric Jameson's canonical arguments about the waning of historicity affect and depth in the postmodern culture of western capitalist societies in the twentieth century and re evaluates and reconceptualises these notions in a twenty first century context In doing so it shows that the contemporary moment should be regarded as a transitional period from the postmodern and into the metamodern cultural moment **HCI International 2020 - Late Breaking Papers: Virtual and Augmented Reality** Constantine Stephanidis, Jessie Y. C. Chen, Gino Fragomeni, 2020-10-07 This book constitutes late breaking papers from the 22nd International Conference on Human Computer Interaction HCII 2020 which was held in July 2020 The conference was planned to take place in Copenhagen Denmark but had to change to a virtual conference mode due to the COVID 19 pandemic From a total of 6326 submissions a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place In addition a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as Late Breaking Work papers and posters These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems The 34 late breaking papers presented in this volume were organized in two topical sections named Virtual Augmented and Mixed Reality Design and Implementation and User Experience in Virtual Augmented and Mixed Reality *Surface and Apparition* Yeseung Lee, 2020-11-12 Surface is one of the most intensely debated topics in recent arts humanities and social science scholarship The changing technologies which manufacture the actual and virtual surfaces of today are radically altering our perception of thresholds and borders In contrast to the responses to preceding industrial revolutions contemporary concerns with surface seem preoccupied with its function of mediation or passage rather than with that of separation or boundary In Surface and Apparition each chapter explores a different meaning and function of the material and immaterial qualities of surface Case studies include various surfaces from computer screens artisanal engines and glass architecture to gauzy veils the planetary surface of supply chain capitalism and spatial embodiment in street markets International scholars of design architecture film media fine art fashion textiles silversmithing woodworking and archival practices account for how the material and the immaterial draw attention to each other in both their everyday and artistic practice Each chapter addresses particular systems from the human body to manually operated tools and machines materials for instance cloth wood and light modes of attention movement and engagement Surface therefore functions in this book as a multidisciplinary method for attending to critical issues concerning human creative and technological endeavours *Interdisciplinary and International Perspectives on 3D Printing in Education* Santos, Ieda M., Ali, Nagla, Areepattamannil, Shaljan, 2018-11-23 Although 3D printing technologies are still a rarity in many classrooms and other educational settings their far reaching applications across a wide range of subjects make them a desirable instructional aid Effective implementation of these technologies can engage learners through project based learning and exploration of objects Interdisciplinary and International Perspectives on

2.5D Printing Carinna Parraman, Maria V. Ortiz Segovia, 2018-08-15. A guide that examines the history and current state of 2.5D printing and explores the relationship between two and three dimensions. 2.5D Printing: Bridging the Gap Between 2D and 3D Applications examines the relationship between two and three dimensional printing and explores the current ideas, methods, and applications. It provides insights about the diversity of our material culture and heritage and how this knowledge can be used to design and develop new methods for texture printing. The authors review the evolving research and interest in working towards developing methods to capture, measure, and model the surface qualities of 3D and 2D objects; represent the appearance of surface material and textural qualities; and print or reproduce the material and textural qualities. The text reflects information on the topic from a broad range of fields including science, technology, art, design, conservation, perception, and computer modelling. 2.5D Printing: Bridging the Gap Between 2D and 3D Applications provides a survey of traditional methods of capturing 2.5D through painting and sculpture and how the human perception is able to judge and compare differences. This important text bridges the gap between the technical and perceptual domains of 2D and 3D printing. Discusses perceptual texture, color illusion, and visual impact to offer a unique perspective. Explores how to print a convincing rendering of texture that integrates the synthesis of texture in fine art paintings with digital deposition printing. Describes contemporary methods for capturing surface qualities and methods for modelling and measuring and ways that it is currently being used. Considers the impact of 2.5D for future technologies. 2.5D Printing is a hands-on guide that provides visual inspiration, comparisons between traditional and digital technologies, case studies, and a wealth of references to the world of texture printing. bridging2d3d From Raw Cutting Toward Precision Machining Peter H.-T. Liu, 2025-11-11

From Raw Cutting Toward Precision Machining builds on the author's earlier book Versatility of Waterjet Technology and chronicles the evolution of waterjet machining from crude cutting to a high precision manufacturing process. Spanning five decades of innovation, it highlights the people, ideas, and milestones that shaped this versatile technology. At its core, the book honors Dr. John Olsen, whose pioneering work in high pressure waterjets laid the foundation for transformative advances. Several chapters explore his pivotal role, including the development of compact, affordable systems for precision and micro machining. The Pacific Northwest's leadership in high pressure hardware, intelligent control software, and abrasive waterjet systems is also featured prominently. In addition to technical breakthroughs, the book examines how marketing, education, and collaboration helped transform waterjets from niche equipment into essential global manufacturing tools. Blending historical insight, technical depth, and personal reflection, this is essential reading for engineers, educators, and anyone curious about the evolution of the manufacturing technology.

The Top Books of the Year Digital Handmade Craftsmanship And The New Industrial Revolution The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Digital Handmade Craftsmanship And The New Industrial Revolution : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Digital Handmade Craftsmanship And The New Industrial Revolution : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
