Communicating Science Communicating Science:

The Science of Communicating Science Craig Cormick, 2019-11-01 Are you wishing you knew how to better communicate science without having to read several hundred academic papers and books on the topic Luckily Dr Craig Cormick has done this for you This highly readable and entertaining book distils best practice research on science communication into accessible chapters supported by case studies and examples With practical advice on everything from messages and metaphors to metrics and ethics you will learn what the public think about science and why and how to shape scientific research into a story that will influence beliefs behaviours and policies

The Chicago Guide to Communicating Science Scott L. Montgomery, 2017-02-21 Enhanced with approximately 100 additional pages this second edition is a testament to the success of the first one Choice For more than a decade The Chicago Guide to Communicating Science has been the go to reference for anyone who needs to write or speak about their research Whether it s a student writing a thesis a faculty member composing a grant proposal or a public information officer crafting a press release Scott Montgomery s advice is perfectly adaptable to any scientific writer s needs This new edition has been thoroughly revised to address crucial issues in the changing landscape of scientific communication with an increased focus on those writers working in corporate settings government and nonprofit organizations as well as academia Half a dozen new chapters tackle the evolving needs and paths of scientific writers These sections address plagiarism and fraud writing graduate theses translating scientific material communicating science to the public and the increasing globalization of research Through solid examples and concrete advice Montgomery helps scientists develop their own voice and become stronger communicators He also addresses the roles of media and the public in scientific attitudes and offers advice for those whose research concerns controversial issues such as climate change or emerging viruses Today communicators must move seamlessly among platforms and styles The Chicago Guide to Communicating Science helps scientists and researchers expertly connect with their audiences no matter the medium

Communicating Science Effectively National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on the Science of Science Communication: A Research Agenda, 2017-03-08 Science and technology are embedded in virtually every aspect of modern life As a result people face an increasing need to integrate information from science with their personal values and other considerations as they make important life decisions about medical care the safety of foods what to do about climate change and many other issues Communicating science effectively however is a complex task and an acquired skill Moreover the approaches to communicating science that will be most effective for specific audiences and circumstances are not obvious Fortunately there is an expanding science base from diverse disciplines that can support science communicators in making these determinations Communicating Science Effectively offers a research agenda for science communicators and researchers seeking to apply this research and fill gaps in knowledge about how to communicate effectively about science focusing in

particular on issues that are contentious in the public sphere To inform this research agenda this publication identifies important influences psychological economic political social cultural and media related on how science related to such issues is understood perceived and used Communicating Science Nicholas Russell,2010 Ideal for students and practitioners in

science engineering and medicine this book gives an insight into science s place in society **Communicating Science in Social Contexts** Donghong Cheng,Michel Claessens,Nicholas R. J. Gascoigne,Jenni Metcalfe,Bernard Schiele,Shunke Shi,2008-07-15 Science communication as a multidisciplinary field has developed remarkably in recent years It is now a distinct and exceedingly dynamic science that melds theoretical approaches with practical experience Formerly well established theoretical models now seem out of step with the social reality of the sciences and the previously clear cut delineations and interacting domains between cultural fields have blurred Communicating Science in Social Contexts examines that shift which itself depicts a profound recomposition of knowledge fields activities and dissemination practices and the value accorded to science and technology Communicating Science in Social Contexts is the product of long term effort that would not have been possible without the research and expertise of the Public Communication of Science and Technology PCST Network and the editors For nearly 20 years this informal international network has been organizing events and forums for discussion of the public communication of science **Communicating Science** LeeAnn

Kahlor,Patricia Stout,2009-11-13 This volume explores the evolution of science communication addressing key issues and offering substance for future study Harnessing the energies of junior scholars on the forefront of science communication this work pushes the boundaries of research forward allowing scholars to sample the multiple paradigms and agendas that will play a role in shaping the future of science communication Editors LeeAnn Kahlor and Patricia Stout challenge their readers to channel the energy within these chapters to build or continue to build their own research agendas as all scholars work together across disciplines to address questions of public understanding of science and communicating science These chapters are intended to inspire still more research questions to help aspiring science communication scholars locate their own creative and original research programs and to help veteran science communication scholars expand their existing programs such that they can more actively build interdisciplinary bridges Crossing methodological boundaries work from quantitative and qualitative scholars social scientists and rhetoricians is represented here This volume is developed for practitioners and scholars alike for anyone who is concerned about or interested in the future of science and how communication is shaping and will continue to shape that future In its progressive pursuit of interdisciplinary research streams of thinking outside methodological and theoretical boxes this book inspires science communication scholars at all levels to set a new standard for collaboration not just for science communication but for communication research in general
