De Wereld Als Werkplaats:

Children Micha De Winter, 2018-04-19 However smart they are from a social perspective children do not really count until maturity Then all of a sudden society expects responsibility independence and in particular commitment This viewpoint shared by so many children and young people today is the basis of much disaffection among youth This miscalculation and how to combat it is the major theme of this book The social qualities expected of young people do not come to them automatically Children need to be guided through social experiences to develop responsibility and commitment The most effective way to inculcate these qualities is to involve children through their active participation in their education and welfare The book reviews the theoretical framework for participation by children and young people and discusses fields of practice where participation is of great importance including local youth policy education and professional youth care Micha de Winter is a professor of child care and in this book he draws on his many years of experience to produce a work which is authoritative inspiring and convincing Children as Fellow Citizens is essential reading for those involved in youth and social policy educators and social scientists as well as social service and health care professionals

Professionalization and Participation in Child and Youth Care P. M. van Den Bergh, F. Verheij, E. J. Knorth, 2017-11-22 This title was first published in 2002 The field of child and youth care is under increasing pressure to optimize its mission to deliver high quality support and to help children parents and families in need of care Two questions have arisen in many countries in the face of this pressure the professional quality of childcare and the participant quality of childcare These issues have traditionally been discussed separately this unique book brings them together for an enlightening discussion Examining the possible antagonism of childcare workers operating as professionals and clients participating as fully engaged partners the book brings to light a new vision on developments and research in the field and informs the reader on recent findings The expertise of the contributors makes this a truly valuable read for practitioners policy makers researchers and students in the field of child and youth care

Beyond the Century of the Child Willem Koops, Michael Zuckerman, 2012-10-30 In 1900 Ellen Key wrote the international bestseller The Century of the Child In this enormously influential book she proposed that the world's children should be the central work of society during the twentieth century Although she never thought that her century of the child would become a reality in fact it had much more resonance than she could have imagined The idea of the child as a product of a protective and coddling society has given rise to major theories and arguments since Key's time For the past half century the study of the child has been dominated by two towering figures the psychologist Jean Piaget and the historian Philippe Ariès Interest in the subject has been driven in large measure by Ariès's argument that adults failed even to have a concept of childhood before the thirteenth century and that from the thirteenth century to the seventeenth there was an increasing childishness in the representations of children and an increasing separation between the adult world and that of the child Piaget proposed that children's logic and modes of thinking are entirely different from those of adults In the

twentieth century this distance between the spheres of children and adults made possible the distinctive study of child development and also specific legislation to protect children from exploitation abuse and neglect Recent students of childhood have challenged the ideas those titans promoted they ask whether the distancing process has gone too far and has begun to reverse itself In a series of essays *Beyond the Century of the Child* considers the history of childhood from the Middle Ages to modern times from America and Europe to China and Japan bringing together leading psychologists and historians to question whether we unnecessarily infantilized children and unwittingly created a detrimental wall between the worlds of children and adults Together these scholars address the question whether a hundred years after Ellen Key wrote her international sensation the century of the child has in fact come to an end

De geest in dit huis is liefderijk Daniela Hooghiemstra, 2013-02-06 De worsteling van een man die probeerde om te leven met God maar zonder Kerk Het verhaal van onderwijshervormer Kees Boeke voert van het negentiende eeuwse Alkmaar naar het industriële Engeland van de eerste moderne oorlog naar de roerige jaren twintig en van de Tweede Wereldoorlog naar de naoorlogse tijd Op basis van nooit eerder gepubliceerde documenten mede over het koningshuis En met veel niet eerder gepubliceerde fotos Christen pacifist Kees Boeke 1884 1966 wordt wel onderwijshervormer genoemd maar hij beoogde niet minder dan de stichting van een nieuwe wereld Als zoon van een domineesdochter en een natuurwetenschapper trouwde hij in 1911 met de schatrijke Betty Cadbury dochter van de bekende quaker en chocoladefabrikant Richard Cadbury uit Engeland In een poging een bezit en hiërarchieloze gemeenschap op te bouwen besloot het echtpaar in 1922 afstand te doen van het vermogen dat zij geërfd had Maar toen de vorming van de nieuwe gedroomde wereld ontaardde in conflicten besloot Kees Boeke in Bilthoven een school te stichten waar kinderen van jongs af aan tot gemeenschapsmensen zouden worden opgevoed Deze unieke school kreeg na de Tweede Wereldoorlog een prominente leerling prinses Beatrix De koninklijke aandacht leek de kroon op Boekes werk maar luidde ook het begin in van zijn ondergang
