zones These localities turned out to be those pockets where the dominant ideas of nation had to be engineered materialized and practiced The book makes an attempt to revisit these complexities by investigating community space relationship in colonial and postcolonial Delhi It raises two fundamental questions How did community and space relation come to be defined on religious lines In what ways were Muslim dominated areas perceived as contested zones Invoking the ideas of homeland as a useful vantage point to enter into the wider discourse around the conceptualization of space the book suggests that the relation between Muslim communities and their living spaces has evolved out of a long process of politicization and communalization of space in Delhi

Vegetarianism, Meat and Modernity in India Johan Fischer, 2023-04-07 Never before in human history have vegetarianism and a plant based economy been so closely associated with sustainability and the promise of tackling climate change Nowhere is this phenomenon more visible than in India which is home to the largest number of vegetarians globally and where vegetarianism is intrinsic to Hinduism India is often considered a global model for vegetarianism However in this book which is the outcome of eight months of fieldwork conducted among vegetarian and non vegetarian producers traders regulators and consumers I show that the reality in India is quite different with large sections of communities being meat eaters In 2011 vegetarian veg green and nonvegetarian non veg brown labels on all packaged foods drinks were introduced in India Paradoxically this grand scheme was implemented at a time when meat and non vegetarian food production trade and consumption were booming The overarching argument of the book is that a systematic study of the complex and changing relationship between vegetarian and non vegetarian understandings and practices illuminates broader transformations and challenges that relate to markets the state religion politics and identities in India and beyond The book's empirical focus is on the changing relationship between vegetarian non vegetarian as understood practised and contested in middle class India while remaining attentive to the vegetarian non vegetarian modernities that are at the forefront of global sustainability debates Through the application of this approach the book provides a novel theory of human values and markets in a global middle class perspective
