**Diffusion of Innovations, 5th Edition** Everett M. Rogers, 2003-08-16 Now in its fifth edition Diffusion of Innovations is a classic work on the spread of new ideas In this renowned book Everett M Rogers professor and chair of the Department of Communication Journalism at the University of New Mexico explains how new ideas spread via communication channels over time Such innovations are initially perceived as uncertain and even risky To overcome this uncertainty most people seek out others like themselves who have already adopted the new idea Thus the diffusion process consists of a few individuals who first adopt an innovation then spread the word among their circle of acquaintances a process which typically takes months or years But there are exceptions use of the Internet in the 1990s for example may have spread more rapidly than any other innovation in the history of humankind Furthermore the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people The fifth edition addresses the spread of the Internet and how it has transformed the way human beings communicate and adopt new ideas

Tattar, 2025-05-20 An analysis of advances in military technology that illustrates the importance of organizational flexibility in both an attacker's innovations and an opponent's adaptations How important is military innovation in determining outcomes during armed conflict In **Innovation and Adaptation in War** Matthew Tattar questions the conventional wisdom that to succeed military organizations must innovate early and often Because successful methods of warfare are soon widely imitated or countered on the international stage the advantages of a particular innovation quickly evaporate Therefore Tattar argues large scale innovations at the cost of organizational flexibility and the ability to adapt to an adversary's innovations may not be the optimal path not just because force readiness is vital but also because innovation does not provide as long lasting and decisive an advantage as may have been previously thought Although other scholars have analyzed the sources of military innovation Tattar is the first to focus on the relationship between innovation and specific military outcomes Looking at several different types of military organizations and many different types of battles he draws on theoretical works in depth historical research and case studies and finds that the initial advantages that are generated by innovation disappear far too rapidly in wartime for militaries to depend on them for victory Furthermore as Tattar demonstrates emphasizing innovation in defense planning at the expense of organizational flexibility can have significant negative consequences The decisive factor in successful adaptation more often than not is a well positioned and flexible organization Providing both a new framework for studying military innovation and a comprehensive review of the current literature in this field **Innovation and Adaptation in War** offers crucial policymaking insights into when and under what circumstances militaries should innovate and adapt
