Strogatz, 2018-09-21 This textbook is aimed at newcomers to nonlinear dynamics and chaos especially students taking a first course in the subject The presentation stresses analytical methods concrete examples and geometric intuition The theory is developed systematically starting with first order differential equations and their bifurcations followed by phase plane analysis limit cycles and their bifurcations and culminating with the Lorenz equations chaos iterated maps period doubling renormalization fractals and strange attractors Differential Equations with Small Parameters and Relaxation Oscillations

E. Mishchenko, 2013-03-09 A large amount of work has been done on ordinary differential equations with small parameters multiplying derivatives This book investigates questions related to the asymptotic calculation of relaxation oscillations which are periodic solutions formed of sections of both slow and fast motion parts of phase trajectories A detailed discussion of solutions of differential equations involving small parameters is given for regions near singular points The main results examined were obtained by L S Pontryagin and the authors Other works have also been taken into account A A Dorodnitsyn's investigations of Van der Pol's equation results obtained by N A Zheleztsov and L V Rodygin concerning relaxation oscillations in electronic devices and results due to A N Tikhonov and A B Vasil'eva concerning differential equations with small parameters multiplying certain derivatives Symbolic and Algebraic Computation Patrizia Gianni, 1989-08-23

The ISSAC 88 is the thirteenth conference in a sequence of international events started in 1966 thanks to the then established ACM Special Interest Group on Symbolic and Algebraic Manipulation SIGSAM For the first time the two annual conferences International Symposium on Symbolic and Algebraic Computation ISSAC and International Conference on Applied Algebra Algebraic Algorithms and Error Correcting Codes AAEECC have taken place as a Joint Conference in Rome July 4-8 1988 Twelve invited papers on subjects of common interest for the two conferences are included in the proceedings and divided between this volume and the preceding volume of Lecture Notes in Computer Science which is devoted to AAEECC 6 This book contains contributions on the following topics Symbolic Algebraic and Analytical Algorithms Automatic Theorem Proving Automatic Programming Computational Geometry Problem Representation and Solution Languages and Systems for Symbolic Computation Applications to Sciences Engineering and Education **Solved Problems in Thermodynamics and Statistical Physics** Gregor Skačej, Primož Ziherl, 2019-11-09

This book contains a modern selection of about 200 solved problems and examples arranged in a didactic way for hands on experience with course work in a standard advanced undergraduate first year graduate class in thermodynamics and statistical physics The principles of thermodynamics and

equilibrium statistical physics are few and simple but their application often proves more involved than it may seem at first sight This book is a comprehensive complement to any textbook in the field emphasizing the analogies between the different systems and paves the way for an in depth study of solid state physics soft matter physics and field theory **Introduction to Differential Equations with Dynamical Systems** Stephen L. Campbell, Richard Haberman, 2011-10-14 Many textbooks on differential equations are written to be interesting to the teacher rather than the student Introduction to Differential Equations with Dynamical Systems is directed toward students This concise and up to date textbook addresses the challenges that undergraduate mathematics engineering and science students experience during a first course on differential equations And while covering all the standard parts of the subject the book emphasizes linear constant coefficient equations and applications including the topics essential to engineering students Stephen Campbell and Richard Haberman using carefully worded derivations elementary explanations and examples exercises and figures rather than theorems and proofs have written a book that makes learning and teaching differential equations easier and more relevant The book also presents elementary dynamical systems in a unique and flexible way that is suitable for all courses regardless of length Scientific and Technical Aerospace Reports , 1994 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Combined Membership List** American Mathematical Society, 1973 Lists for 19 include the Mathematical Association of America and 1955 also the Society for Industrial and Applied Mathematics *U.S. Government Research Reports* , 1963 **Subject Index to Unclassified ASTIA Documents** Defense Documentation Center (U.S.), 1960
