Environmental Ethics Bob Jickling, Heila Lotz-Sisitka, Lausanne Olvitt, Rob O'Donoghue, Ingrid Schudel, Dylan McGarry, Blair Niblett, 2021-12-07 This well constructed and highly original sourcebook integrates educational materials for teaching environmental ethics with theoretical reflections The book is set to contribute immensely to its aim of taking ethics out of philosophy departments and putting it into the streets into villages and on the Earth to make ethics an everyday activity not something left to experts and specialists Context based activities are presented in almost every chapter While it acknowledges foundational theories in environmental ethics and the work that they continue to do it wholeheartedly embraces a growing body of literature that emphasises contextual process oriented and place based approaches to ethical reflection deliberation and action It walks on the ground and isn't afraid to get a little dirty or to seek joy in earthly relationships And it ultimately breaks with much Western academic tradition by framing ethics in a storied world thus making room to move beyond Euro American perspectives in environmental issues This work will be of interest to school teachers and other non formal and informal educators teacher educators college instructors university professors and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices *The Fifth Estate* William H. Dutton, 2023 In the eighteenth century the printing press enabled the rise of an independent press the Fourth Estate that helped check the power of governments business and industry In similar ways the internet is forming a more independent collectivity of networked individuals which William H Dutton identifies as the Fifth Estate Their network power is contributing to a more pluralist role of individuals in democratic political processes and society which is not only shaping political accountability but nearly every sector of society Yet a chorus of critics have dismissed the internet's more democratic potentials demonizing social media and user generated content as simply sources of fake news and populism So is the internet a tool for democracy or anarchy In *The Fifth Estate* Dutton uses estate theory to illuminate the most important power shift of the digital age He argues that this network power shift is not only enabling greater democratic accountability in politics and governance but is also empowering networked individuals in their everyday life and work from checking facts to making civic minded social interventions By marshalling world leading research and case studies in a wide range of contexts Dutton demonstrates that the internet and related digital media are enabling ordinary individuals to search create network collaborate and leak information in such independent and strategic ways that they enhance their informational and communicative power vis vis other actors and institutions Dutton also makes the case that internet policy interventions across the globe have increased censorship of users and introduced levels of surveillance that will challenge the vitality of the internet and the Fifth Estate along with its more pluralist distribution of power Ambitious and timely Dutton provides an understanding of the Fifth Estate and its democratic potential so that networked individuals and institutions around the world can maintain and enhance its role in our digital age *How the Zebra Got Its Stripes* Léo Grasset, 2017-05-09 Why do
