Cohesion In English Halliday:

Cohesion in English M.A.K. Halliday, Ruqaiya Hasan, 2014-01-14 Cohesion in English is concerned with a relatively neglected part of the linguistic system its resources for text construction the range of meanings that are specifically associated with relating what is being spoken or written to its semantic environment A principal component of these resources is cohesion This book studies the cohesion that arises from semantic relations between sentences Reference from one to the other repetition of word meanings the conjunctive force of but so then and the like are considered Further it describes a method for analysing and coding sentences which is applied to specimen texts Cohesion in English Michael Alexander Kirkwood Halliday, 1976 Collaborating Towards Coherence Sanna-Kaisa Tanskanen, 2006-01-01 This book approaches cohesion and coherence from a perspective of interaction and collaboration After a detailed account of various models of cohesion and coherence the book suggests that it is fruitful to regard cohesion as contributing to coherence as a strategy used by communicators to help their fellow communicators create coherence from a text Throughout the book the context sensitive and discourse specific nature of cohesion is stressed cohesive relations are created and interpreted in particular texts in particular contexts By investigating the use of cohesion in four different types of discourse the study shows that cohesion is not uniform across discourse types The analysis reveals that written dialogue computer mediated discussions and spoken monologue prepared speech make use of similar cohesive strategies as spoken dialogue conversations in these contexts the communicators interaction with their fellow communicators leads to a similar outcome The book suggests that this is an indication of the communicators attempt to collaborate towards successful communication **Text Complexity and Reading Comprehension Tests** Erik Castello, 2008 Based on the analysis of a specially compiled corpus of internationally recognized English as a foreign language EFL reading tests at different levels of proficiency this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests It brings together linguistic investigations into the text inherent complexity of the tests and a study of the data derived from their administration to groups of Italian university students The study of text complexity draws on corpus linguistics text linguistics and systemic functional linguistics Both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests The assessment of test difficulty on the other hand is informed by research on language testing and in particular by findings and methodologies of Classical Test Theory and Item Response Theory Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text inherent complexity perceived test difficulty and actual test difficulty **English General Nouns** Michaela Mahlberg, 2005-01-01 This book proposes an innovative approach to general nouns General nouns

are defined as high frequency nouns that are characterized by their textual functions Although the concept is motivated by Halliday Hasan 1976 the corpus theoretical approach adopted in the present study is fundamentally different and set in a linguistic framework that prioritizes lexis The study investigates 20 nouns that are very frequent in mainstream English as represented by the Bank of English Corpus The corpus driven approach to the data involves a critical discussion of descriptive tools such as patterns semantic prosodies and primings of lexical items and the concept of local textual functions is put forward to characterize the functions of the nouns in texts The study not only suggests a characterization of general nouns but also stresses that functions of lexical items and properties of texts are closely linked This link requires new ways of describing language

New Research on Cohesion and Coherence in Linguistics Zhang Delu, Liu Rushan, 2021-09-15 The study of text cohesion and coherence has been a topic of heated discussion in Linguistics since the 1990s Western linguists have developed two major theoretical frameworks to describe the relationship between the two concepts one posits that cohesive devices are important means to ensure cohesion the other argues that coherence does not rely on cohesion Yet neither has complete explanatory power over reality nor can they solve real life problems This title proposes a creative concrete and highly operational theoretical model that unites cohesion and coherence using authentic English or Chinese examples The authors clarify the concepts of coherence and expand the scope of the research by focusing on a variety of internal and external factors such as psycho cognitive and socio cultural factors Moreover the authors propose that the new theoretical paradigm can be applied to a range of other disciplines including translation and foreign language teaching This title has been one of the most cited works on cohesion and coherence in China Students and scholars of discourse analysis linguistics and language education will find this an invaluable reference

Cohesion in English M. A. K. Halliday, Ruqaiya Hasan, 1992 *Cohesion in English* M. Halliday, 1976 **Cohesion in English** M. A. K. Halliday, 1990 GECCo - German-English Contrasts in Cohesion Kerstin Kunz, Ekaterina Lapshinova-Koltunski, José Manuel Martínez Martínez, Katrin Menzel, Erich Steiner, 2021-10-25 In contrastive linguistics of English and German there is a tradition of accounting for contrasts with respect to grammar and to a lesser extent for lexis and phonetics Moving on to discourse and text there is a sizeable body of literature on cohesive patterns in English and German respectively but very little in terms of a comparison The latter though is of particular interest for language learners translators and of course linguists and researchers in language technology This book attempts to close this gap based on a number of years of corpus based study into variation and cohesion in the two languages While there is an overall focus on language contrasts it also investigates variation between different registers language internally and between written and spoken mode in particular For each of the five major types of cohesion co reference substitution ellipsis conjunctive relations and lexical cohesion overviews are given of contrasts in the system and of contrastive frequencies in texts Results and methods presented in this book are thus relevant for language teaching translation language technology and corpus based work on English and German generally
