Computer-Supported Collaborative Learning at the Workplace Sean P. Goggins, Isa Jahnke, Volker Wulf, 2013-05-13
This book is an edited volume of case studies exploring the uptake and use of computer supported collaborative learning in work settings. This book fills a significant gap in the literature. A number of existing works provide empirical research on collaborative work practices: Lave Davenport 2005, the sharing of information at work; Brown Duguid 2000, and the development of communities of practice in workplace settings; Wenger 1998. Others examine the munificent variation of information and communication technology use in the work place including studies of informal social networks, formal information distribution, and other socio technical combinations found in work settings: Gibson Cohen 2003. Another significant thread of prior work is focused on computer supported collaborative learning, much of it investigating the application of computer support for learning in the context of traditional educational institutions like public schools, private schools, colleges, and tutoring organizations. Exciting new theories of how knowledge is constructed by groups: Stahl 2006, how teachers contribute to collaborative learning, reference to another book in the series, and the application of socio technical scripts for learning is explicated in book length works on CSCL. Book length empirical work on CSCW is widespread, and CSCL book length works are beginning to emerge with greater frequency. We distinguish CSCL at Work from prior books written under the aegis of training and development or human resources more broadly. The book aims to fill a void between existing works in CSCW and CSCL and will open with a chapter characterizing the emerging application of collaborative learning theories and practices to workplace learning. CSCL and CSCW research each make distinct and important contributions to the construction of collaborative workplace learning.

The Computer Supported Collaborative Learning (CSCL) Conference 2013, Volume 2 ISLS, 2014-04-23
The Computer Supported Collaborative Learning CSCL Conference 2013 proceedings Volume 2 Innovative Teaching Strategies and New Learning Paradigms in Computer Programming Ricardo Queirós, 2014-11-30
Courses in computer programming combine a number of different concepts from general problem solving to mathematical precepts such as algorithms and computational intelligence. Due to the complex nature of computer science education, teaching the novice programmer can be a challenge. Innovative Teaching Strategies and New Learning Paradigms in Computer Programming brings together pedagogical and technological methods to address the recent challenges that have developed in computer programming courses. Focusing on educational tools, computer science concepts, and educational design, this book is an essential reference source for teachers, practitioners, and scholars interested in improving the success rate of students.

Digital and Cultural Influences on the Development of Pedagogical Content Knowledge (PCK) and TPACK Mısırlı, Zeynel Abidin, Taskin Bedizel, Nazli Ruya, 2025-04-03 The integration of digital and cultural factors into education is reshaping how teachers develop their Pedagogical Content Knowledge PCK and Technological Pedagogical Content Knowledge TPACK These frameworks are vital for equipping educators to effectively blend subject expertise teaching strategies and technology in culturally diverse classrooms By understanding the interplay

between digital tools and cultural contexts educators can create more inclusive and engaging learning environments This focus on adaptive teaching methods enhances educational equity fosters critical thinking and prepares students to navigate a globalized technology driven world Ultimately these advancements contribute to a more dynamic and responsive educational system

Digital and Cultural Influences on the Development of Pedagogical Content Knowledge PCK and TPACK explores the intersection of digital tools and cultural contexts in shaping PCK and TPACK It provides educators and researchers with insights into leveraging technology and cultural awareness to enhance teaching practices and improve student learning outcomes Covering topics such as multicultural classrooms virtual spaces and assessment practices this book is an excellent resource for educators school administrators professionals researchers scholars academicians and more Perspectives on Wearable Enhanced Learning (WELL) Ilona Buchem,Ralf Klamma,Fridolin Wild,2019-11-01 Wearable technologies such as smart glasses smart watches smart objects or smart garments are potential game changers breaking ground and offering new opportunities for learning These devices are body worn equipped with sensors and integrate ergonomically into everyday activities With wearable technologies forging new human computer relations it is essential to look beyond the current perspective of how technologies may be used to enhance learning This edited volume Perspectives on Wearable Enhanced Learning aims to take a multidisciplinary view on wearable enhanced learning and provide a comprehensive overview of current trends research and practice in diverse learning contexts including school and work based learning higher education professional development vocational training health and healthy aging programs smart and open learning and work This volume features current state of the art wearable enhanced learning and explores how these technologies have begun to mark the transition from the desktop through the mobile to the age of wearable ubiquitous technology enhanced learning *The Impact of Digitalization in the Workplace* Christian Harteis,2017-09-30 This edited volume brings together researchers from various disciplines i e education psychology sociology economy information technology engineering discussing elementary changes at workplaces occurring through digitalization and reflecting on educational challenges for individuals organizations and society The latest developments in information and communication technology seem to open new potential and the crucial question arises which kind of work can be replaced by technology The contributors to this volume are scholars who have been conducting research on the influence of technological change on work and individuals for a long time The book addresses researchers as well as practitioners in the field of adult education and human resource development *International Handbook of Computer-Supported Collaborative Learning* Ulrike Cress,Carolyn Rosé,Alyssa Friend Wise,Jun Oshima,2021-10-08 CSCL has in the past 15 years and often in conjunction with Springer grown into a thriving and active community Yet lacking is a comprehensive CSCL handbook that displays the range of research being done in this area This handbook will provide an overview of the diverse aspects of the field allowing newcomers to develop a sense of the entirety of CSCL research and for existing community members to become more deeply

aware of work outside their direct area The handbook will also serve as a ready reference for foundational concepts methods and approaches in the field The chapters are written in such a way that each of them can be used in a stand alone fashion while also serving as introductory readings in relevant study courses or in teacher education While some CSCL relevant topics are addressed in the International Handbook of the Learning Sciences and the International Handbook of Collaborative Learning these books do not aim to present an integrated and comprehensive view of CSCL The International Handbook of Computer Supported Collaborative Learning covers all relevant topics in CSCL particularly recent developments in the field such as the rise of computational approaches and learning analytics
