Medical Informatics Europe '90 Rory O'Moore,Stellan Bengtsson,John R. Bryant,John S. Bryden,2013-03-09 The software has been developed in Smalltalk80 1 on SUN and Apple Macintosh computers Smalltalk80 is an object oriented programming system which permits rapid prototyping The need for prototyping in the specification of general practitioner systems was highlighted as long ago as 1980 4 and is essential to the user centred philosophy of the project The goal is a

hardware independent system usable on any equipment capable of supporting an integrated environment for handling both textual and graphics and point and select interaction The architecture is extensible and provides a platform for future experimentation with technical advances such as touch screens and voice technology User Interface Management Systems UIMS technology is developing rapidly offering a number of techniques which allow the abstract design of the interface to be separated from the screen display management on one hand and the internal workings of the application on the other 2 The importance of this layered approach is that such techniques enable the user to tailor the application to his her individual preferences and the design team has included and developed many of these ideas into the design 7 Conclusion Value Added to Health

Graphic Communications Martin L. Greenwald, John C. Luttrupp, 1997 This book offers comprehensive coverage of each step of design through production with reference to traditional processes and how they relate to current state of the art technologies Topics include typography creative design budgeting scheduling computer graphics digital data photographic imaging image manipulation CD ROM technology prepress printing processes with practical applications in designing for production The elements of creative graphic design and the role of the computer as a basic design and problem solving tool emphasize the transference of skills
