Computer Supported Cooperative Work Introduction To Distributed Applications:

Computer-Supported Cooperative Work Uwe M. Borghoff, Johann H. Schlichter, 2000-07-14 A detailed introduction to interdisciplinary application area of distributed systems namely the computer support of individuals trying to solve a problem in cooperation with each other but not necessarily having identical work places or working times The book is addressed to students of distributed systems communications information science and socio organizational theory as well as to users and developers of systems with group communication and cooperation as top priorities

Computer-Supported Cooperative Work Uwe M. Borghoff, Johann H. Schlichter, 2013-11-09 The terms groupware and CSCW computer supported cooperative work have received significant attention in computer science and related disciplines for quite some time now This book is a revised and extended version of the 2nd edition of the German textbook *Rechnergestützte Gruppenarbeit Eine Einführung in verteilte Anwendungen* It has two main objectives first to outline the meaning of both terms and second to point out both the numerous opportunities for users of groupware and the risks of applying such systems The book intends to introduce an area of distributed systems namely the computer support of individuals trying to solve a common problem in cooperation with each other but not necessarily having identical work places or working times Computer supported cooperative work is an interdisciplinary application domain It can be viewed as a synergism between the areas of distributed systems and multimedia communication on the one hand and between those of information science and socio organizational theory on the other hand Thus the book is meant to help students of all these disciplines as well as users and developers of systems which have communication and cooperation within groups as top priorities

CSCW in Practice: an Introduction and Case Studies Dan Diaper, Colston Sanger, 2012-12-06 Dan is this book going to provide a substantial coherent and timely contribution to CSCW or is it just going to be a ragbag of papers from several meetings stuck together The latter of course Colston However and the However was rather long and technical but not substantially different in overall content from that of this preface Most of the papers contained in this book were initially presented at meetings organized by the UK's Computer Supported Cooperative Work CSCW Special Interest Group in 1991 but the book is not a proceedings whatever the above quotation suggests Readers will immediately notice that unlike typical proceedings all the references are placed together at the end of the book and that there is a substantial index the hall mark of all proper technical books of quality If you choose to delve further than this preface you will find that each chapter is cross referenced thus you also gain a coherent structure across chapters an advantage traditionally associated with high quality single author books Furthermore turning apparent disadvantage to advantage while single author books must inevitably present the idiosyncratic perspective of their author in this book and appropriately for a young area such as CSCW you will be presented with the views of a dozen CSCW experts who all have considerable hard won experience gained over many years

Computer Supported Cooperative Work in Design I Weiming Shen,Zongkai Lin,Jean-Paul A. Barthès,Tangqiu Li,2005-11-04 The design of complex artifacts and systems requires the cooperation of multidisciplinary design teams using multiple commercial and non commercial engineering tools such as CAD tools modeling simulation and optimization software engineering databases and knowledge based systems Individuals or individual groups of multidisciplinary design teams usually work in parallel and separately with various engineering tools which are located on different sites often for quite a long time At any moment individual members may be working on different versions of a design or viewing the design from various perspectives at different levels of detail In order to meet these requirements it is necessary to have effective and efficient collaborative design environments These environments should not only automate individual tasks in the manner of traditional computer aided engineering tools but also enable individual members to share information collaborate and coordinate their activities within the context of a design project CSCW computer supported cooperative work in design is concerned with the development of such environments Proceedings of the Third European Conference on Computer-Supported Cooperative Work 13-17 September 1993, Milan, Italy ECSCW '93 Giorgio De Michelis,Carla Simone,K.
