Etcheverria,2018-10-09 Gastronomy particularly gourmet tourism is widely acknowledged as having a powerful impact on local development Public policies have developed in response to research highlighting gastronomy as key in a successful tourism economy However research thus far has not fully explored the underlying mechanisms of gastronomic tourism in particular the marketing and perception of quality on economic development This book considers how the quality of products places and experiences contributes to the desirability and competitiveness of gourmet touristic destinations The contributors present theoretical and empirical studies to create an original conceptual framework for regional development based on the quality of products of places and of touristic experience It also examines the ways in which quality is linked to identity diversity innovation and creativity With an interdisciplinary approach this book will be of interest to researchers in tourism and hospitality regional studies and human geography as well as to tourism development professionals and policymakers in the areas of rural and local development Wine Enthusiast ,1995-10 *Native Wine Grapes of Italy* Ian

D'Agata,2014-05-16 Mountainous terrain volcanic soils innumerable microclimates and an ancient culture of winemaking influenced by Greeks Phoenicians and Romans make Italy the most diverse country in the world of wine This diversity is reflected in the fact that Italy grows the largest number of native wine grapes known amounting to more than a quarter of the world s commercial wine grape types Ian D Agata spent thirteen years interviewing producers walking vineyards studying available research and tasting wines to create this authoritative guide to Italy s native grapes and their wines Writing with great enthusiasm and deep knowledge D Agata discusses more than five hundred different native Italian grape varieties from Aglianico to Zibibbo D Agata provides details about how wine grapes are identified and classified what clones are available which soils are ideal and what genetic evidence tells us about a variety s parentage He gives historical and anecdotal accounts of each grape variety and describes the characteristics of wines made from the grape A regional list of varieties and a list of the best producers provide additional guidance Comprehensive thoroughly researched and engaging this book is the perfect companion for anyone who wants to know more about the vast enological treasures cultivated in Italy

Food & Wine ,2003-07 *Sunset* ,1998 *The Rural* Richard Munton,2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural

populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts
