Dictionnaire Pens E Cologique Dominique Bourg:

Decolonial Ecology Malcom Ferdinand, 2021-11-11 The world is in the midst of a storm that has shaped the history of modernity along a double fracture on the one hand an environmental fracture driven by a technocratic and capitalist civilization that led to the ongoing devastation of the Earth's ecosystems and its human and non human communities and on the other a colonial fracture instilled by Western colonization and imperialism that resulted in racial slavery and the domination of indigenous peoples and women in particular In this important new book Malcom Ferdinand challenges this double fracture thinking from the Caribbean world Here the slave ship reveals the inequalities that continue during the storm some are shackled inside the hold and even thrown overboard at the first gusts of wind Drawing on empirical and theoretical work in the Caribbean Ferdinand conceptualizes a decolonial ecology that holds protecting the environment together with the political struggles against post colonial domination structural racism and misogynistic practices Facing the storm this book is an invitation to build a world ship where humans and non humans can live together on a bridge of justice and shape a common world It will be of great interest to students and scholars in environmental humanities and Latin American and Caribbean studies as well as anyone interested in ecology slavery and de colonization **Penser l'écologie**

dans la tradition catholique Fabien Revol, 2018-10-24 Apr s la diffusion de l'Encyclique Laudato si du pape François il semble que le catholicisme ait pris bras le corps la question ecologique Est ce un fait nouveau Le but de cet ouvrage est de donner des éléments substantiels et représentatifs de la tradition théologique et spirituelle catholique au fil des siècles afin de mettre en valeur l'originalité du rapport de l'homme la nature et les représentations de la création véhiculées par la révélation chrétienne revue et vécues par la tradition catholique **A Critical Theory for the Anthropocene** Nathanaël

Wallenhorst, 2023-09-15 This volume which is rooted in biogeophysical studies addresses conceptions of political action in the Anthropocene and the tension between a desire to accomplish the Promethean project of modernity and a post Promethean approach This work explores the idea of an anthropological mutation of political consolidation from a post Promethean togetherness to creating the capacity to act together The political thinking of the human condition developed by Hannah Arendt is important here as a resource for thinking about humanity in terms of human adventure This has three dimensions hubris the world and coexistence referring respectively to the logic of profit of the homo oeconomicus the logic of responsibility of the homo collectivus and the logic of the hospitality of the homo religatus The intellectual and political attitude outlined in this book is an extension of critical theory the work also puts forward a critique of what poses a problem in our relationship to the world and suggests how to overcome it the ultimate goal being social transformation The author proposes an uprising and an anthropological consolidation of politics based on the revitalization that is brought about by the sharing of a conviviality both between humans and with what is non human The identification of conviviality as an educational paradigm to survive the Anthropocene gives us the much needed reason for hope despite this heritage of the

Anthropocene In addition to Arendtian thinking this critical theory for the Anthropocene draws on the political thinking of several contemporary authors including Maurice Bellet Hartmut Rosa Andreas Weber Dominique Bourg and Christian Arnsperger This volume is of interest to researchers in the Anthropocene

Contemporary French Environmental Thought in the Post-COVID-19 Era Keith Moser, 2022-04-07 Contemporary French Environmental Thought in the Post COVID 19 Era is focused on the fields of biosemiotics linguistics ecocriticism and environmental ethics Closely aligning with Sustainable Development Goal 13 1 Keith Moser's study aims to strengthen resilience to climate related hazards by drawing on ecological theories developed by French philosophers in conversation with biosemiotic principles Not only does the novel theoretical framework offered by biosemiotic interpretations of the universe and our place in it represent an indispensable conceptual tool for understanding the unprecedented medical challenges at the dawn of a new millennium but it also beckons us to think harder about the environmental crisis that threatens the continued existence of all sentient beings who call the biosphere home This book also highlights the richness diversity and utility of the ecological theories developed by the French philosophers Michel Serres Edgar Morin Jacques Derrida Dominique Lestel and Michel Onfray in addition to how they engage with biosemiotic principles Taken together the book probes the scientific linguistic philosophical and ethical implications of biosemiotic theories in a post pandemic world from an environmental and medical perspective

Our Common Cosmos Zoë Lehmann Imfeld, Andreas Losch, 2018-12-27 This volume collects an international body of voices as a timely response to a rapidly advancing field of the natural sciences The contributors explore how the disciplines of theology earth and space sciences contribute to the debate on constantly expanding ethical challenges and the prospect of humanity's future The discussions offered in this volume see the community as central to a sustainable and ethical approach to earth and space sciences examining the role of theology in this communal approach but also recognizing theology itself as part of a community of humanity disciplines Examining the necessity for interaction between disciplines this collection draws on voices from biodiversity studies geology aesthetics literature astrophysics and others to illustrate precisely why a constructive and sustainable dialogue is needed within the current scientific climate

Philosophy of Education in the Anthropocene Renaud Hétier, Nathanaël Wallenhorst, 2025-03-24 This book develops a philosophy of education for the Anthropocene proposing that we think about education in the light of contemporary bioclimatic challenges Education is seen as the political means of choice for containing the runaway Earth system change and ensuring the sustainability of human life in society In this book Hétier and Wallenhorst continue their work on the biogeophysical and socio political analysis of the Anthropocene here tracing the path toward the re founding of a political education to prepare students to address the greatest challenge of our time the gradual disappearance of the bioclimatic conditions necessary for our very existence

Chaos in the Heavens Jean-Baptiste Fressoz, Fabien Locher, 2024-03-12 Nothing could seem more contemporary than climate change Yet in Chaos in the Heavens Jean Baptiste Fressoz and Fabien Locher show that we have been thinking about and debating the consequences of our actions upon the environment for centuries The subject was raised wherever history accelerated by the conquistadors in the New World by the French revolutionaries of 1789 by the scientists and politicians of the nineteenth century by the European imperialists in Asia and Africa until the Second World War Climate change was at the heart of fundamental debates about colonisation God the state nature and capitalism From these intellectual and political battles emerged key concepts of contemporary environmental science and policy For a brief interlude science and industry instilled in us the reassuring illusion of an impassive climate But in the age of global warming we must once again confront the chaos in the heavens
