crisscrossed into the other's territory of inquiry and related their ideas to include the full scope of humanity. One went deeply into soul and found matter whereas the other went deeply into matter and found soul. In their own ways both spent their careers trying to heal the split between spirit and matter in the *weltanschauung* of their times reflected in the human psyche and in the general religious views permeating most of Western culture.

*The Dream: The Vision of the Night* Max Zeller, 2015-06-01 A classic in the field of dream analysis. *The Dream: The Vision of the Night* is a collection of essays, lectures, and vignettes by Max Zeller whose career included a law degree, a brief imprisonment in a Nazi Concentration Camp, study at the Jung Institute in Zurich, Switzerland, and thirty years of in-depth work as a Jungian analyst. In the eighteen pieces of this collection, Zeller intersperses theoretical writings, compassionate and incisive case studies, and powerful, almost haiku-like reminiscences of certain incidences in his life, from his meetings with C. G. Jung to his impressions of life in pre-war Nazi Germany. *The Dream: The Vision of the Night* is the best example of amplification of Jungian principles that can be found. Neither pure research nor pure memoir, the collection is an affective combination of both and, as such, best portrays the spirit of its author: always restless and searching, always compassionate and open-minded, and above all, always fascinated by the mystery and power of our dreams.

*Field, Form, and Fate* Michael Conforti, 2019-11-28 C. G. Jung emphasized the deep link to the physical world that exists for the collective unconscious and its archetypes. Our dreams and symbols, as well as the patterns of our behavior, are shaped by the fact that we are creatures of a material universe. Michael Conforti's research has been directed to understanding the nature of these links and patterns in the light of the new sciences: quantum theory, chaos theory, self-organization, and the new biology. Conforti's book successfully integrates this material to offer a new, exciting challenge to psychotherapy. It demonstrates that the study of consciousness cannot neglect the insights of the sciences, and in doing so, promises a unified view of mind and matter.
