

STEM STITCH

Also known as **crystal stitch**, **stem stitch** and **French hemstitch stitch**.

Stem stitch is one of the most frequently used embroidery stitches. It is quick and easy to work and follows intricate curves and linear designs well. Each stitch should be kept evenly sized and of an even size. A backwater needle line can be made by inserting the needle into the fabric at a right angle, instead of directly into the fabric as covered by the stitch.

Work stem stitch smoothly, with a simple forward and backward motion along the line. It is often always keeping the working thread in front of the needle. When the thread is kept in the back of the needle, the effect of the stitch is slightly different and it is then known as **crystal stem stitch**.

WHIPPED STEM STITCH

Whipped stem stitch makes a stronger line than ordinary stem stitch (above). Use it when you want a heavy outline which will follow a complex design well. The stitch can be made more decorative if a contrasting colour and texture

PORTUGUESE KNOTTED STEM STITCH

Portuguese knotted stem stitch makes a knotted rope-like line which is accentuated when it is stitched in a thick, twisted thread such as periwinkle. This stitch is ideal for outlining designs where a heavy effect is required.

Work this stitch using an ordinary stem stitch needle.

or thread is used for the whipping element. The effect created by whipped stem stitch depends on the choice of whipping thread. Obtain a heavy, twisted thread in the same colour as the stem stitch you intend to use. The stitching looks like the work of a flat, twisted cotton or a contrasting colour produced an entirely different effect.

First work a foundation row of ordinary stem stitch, then whip this line with a second thread without picking up any ground fabric. Use a third, more heavily twisted, for the whipping element to avoid pulling the stitches in the foundation line.

Outline stitch is a versatile perfect for outlining and for linear designs as it follows a single or multiple rows. The effect imparted it makes a heavy thread, depending on the design. The stitch should be kept quite even size, and should be really straight, but always keep the working thread out of the needle. The stitched will follow opposite direction to that of stem stitch.
