Online Games, Social Narratives Esther MacCallum-Stewart,2014-06-13 The study of online gaming is changing It is no longer enough to analyse one type of online community in order to understand the plethora of players who take part in online worlds and the behaviours they exhibit MacCallum Stewart studies the different ways in which online games create social environments and how players choose to interpret these These games vary from the immensely popular social networking games on Facebook such as Farmville to Massively Multiplayer Online Roleplaying Games to Free to Play online gaming and console communities such as players of Xbox Live and PS3 games Each chapter deals with a different aspect of social gaming online breaking down when games are social and what narrative devices make them so This cross disciplinary study will appeal to those interested in cyberculture the evolution of gaming technology and sociologies of media *Online Gaming* Garry Crawford,2011-08-04 This title provides an accessible introduction to the study of digital gaming and is the first book to explicitly and comprehensively address how digital games are experienced and engaged with in the everyday lives social networks and consumer patterns of gamers Time to Write, Second Edition John Sylvester Lofty,2015-02-10 To read John s work is to take on the role of a patient listener A book like a piece of music is scored for time and I feel Time to Write is scored adagio I believe that Time to Write can be read as a critique of the time chopping approach to education and an argument for presence for being fully open to experience for being there To do good work we must enter something like island time or what John calls existential time or what is sometimes called flow when we lose at least temporarily a sense of clock time from the Foreword by Thomas Newkirk Twenty five years ago John Sylvester Lofty studied the influence of cultural time values on students resistance to writing instruction in an isolated Maine fishing community For the new edition of Time to Write Lofty returned to the island to consider how social and educational developments in the intervening years may have affected both local culture and attitudes toward education Lofty discovered how the island time values that previously informed students literacy learning have been transformed by outside influences including technology social media and the influx of new residents from urban areas Building on the ethnographic findings of the original study the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication and those of school based literacy Lofty examines the new literacies now essential for students in a technologically connected

world both those who aspire to continue the traditional island work of lobster fishing and for the many who now choose to pursue other careers and attend college on the mainland
