Commodification And Spectacle In Architecture A Harvard Design Magazine Reader:

Commodification And Spectacle in Architecture William S. Saunders, More than ever architectural design is seen as a means to promote commercial goals rather than as an end in itself Frank Gehry's Guggenheim Museum in Bilbao for example simply cannot be considered apart from its intended role as a catalyst for the economic revitalization of Bilbao and its ability to attract tourist dollars regardless of its architectural merits A built environment intended to seduce consumers is more likely to offer instant gratification than to invite independent thought and reflection But how harmful if at all is this unprecedented commercialization of architecture Framed with a provocative introduction by Kenneth Frampton the contributions to *Commodification and Spectacle in Architecture* stake out a variety of positions in the debate over the extent to which it is possible or desirable to escape from resist or suggest plausible alternatives to the dominant culture of consumer capitalism Rejecting any dreamy nostalgia for an idealized present or past in which design is completely divorced from commerce and in some cases celebrating the pleasures of spectacle the individual essays range from indictments of particular architects and critiques of the profession to broader concerns about what the phenomenon of commodification means for the practice of democracy and the health of society Bringing together an impressive and varied group of critics and practitioners *Commodification and Spectacle in Architecture* will help to sharpen the discussion of how design can respond to our hypercommodified culture Contributors Michael Benedikt Luis Fernandez Galiano Thomas Frank Kevin Ervin Kelley Daniel Naeyegele Rick Poynor Michael Sorkin Wouter Vanstiphout William S Saunders is editor of *Harvard Design Magazine* and assistant dean for external relations at the Harvard Design School He is the author of *Modern Architecture Photographs* by Ezra Stoller Kenneth Frampton is Ware Professor of Architecture at Columbia University Graduate School of Architecture Planning and Preservation and author of many books including *Labour Work and Architecture*

Constructing a New Agenda A. Krista Sykes, 2012-03-20 This follow up to Kate Nesbitt's best selling anthology *Theorizing a New Agenda* collects twenty eight essays that address architecture theory from the mid 1990s where Nesbitt left off through the present Kristin Sykes offers an overview of the myriad approaches and attitudes adopted by architects and architectural theorists during this era Multiple themes including the impact of digital technologies on processes of architectural design production materiality and representation the implications of globalization and networks of information the growing emphasis on sustainable and green architecture and the phenomenon of the starchitect and iconic architecture appear against a background colored by architectural theory as it existed from the 1960s on in a period of transition if not crisis that centers around the perceived abyss between theory and practice Theory's transitional state persists today rendering its immediate history particularly relevant to contemporary thought and practice While other collections of recent theoretical writings exist none attempt to address the situation as a whole providing in one place key theoretical texts of the past decade and a half This book provides a foundation for ongoing discussions surrounding contemporary architectural

The Resistant Object of Architecture Petra Čeferin, 2020-12-30 Architecture's role is becoming increasingly limited to serving the all pervasive system of globalised capitalism and becoming a constituent complicit part of its mechanism The Resistant Object of Architecture addresses this problem and does so in a way that represents a marked departure from predominant responses which as the book shows do not address the core issue The book addresses this problem by focusing on the question what is architecture and responds to this question by developing the immanent structural logic of architecture that enables it to work not only as an instrumental thinking practice but as a practice of creative thinking This means that it alone determines its issues problems and priorities and precisely because of that it has the capacity and cogency to destabilise indeed pierce holes in the system in which it operates The Resistant Object of Architecture draws on various theoretical sources from the psychoanalysis of Jacques Lacan and the philosophy of Alain Badiou to contemporary architectural theory In contrast to the predominant view of today it demonstrates that architecture has an affirmative transformative capacity This book is an ideal read for those interested in architectural theory and history analysis of contemporary architecture and philosophy of architecture

Cities for Smart Environmental and Energy Futures Stamatina Th. Rassia, Panos M. Pardalos, 2013-08-15 Cities for Smart Environmental and Energy Futures presents works written by eminent international experts from a variety of disciplines including architecture engineering and related fields Due to the ever increasing focus on sustainable technologies alternative energy sources and global social and urban issues interest in the energy systems for cities of the future has grown in a wealth of disciplines Some of the special features of this book include new findings on the city of the future from the macro to the micro level These range from urban sustainability to indoor urbanism and from strategies for cities and global climate change to material properties The book is intended for graduate students and researchers active in architecture engineering the social and computational sciences building physics and related fields

Re-imagining the Contemporary Museum Carlo Aiello, 2012-01-01 The architecture for performance and exhibition being museums galleries music halls pavilions etc has been in the leading edge of architectural innovation throughout the history and evolution of the discipline Architects and designers experiment on new aesthetics concepts and ideas with projects that tend to have a flexible program and a large budget In many cases the main requirement of such structures is not only to accommodate a specific program but also to inspire the imagination of its users and challenge the current state of architectural design Some examples such as the Guggenheim Museum Bilbao by Frank Gehry or the Sydney Opera House by Jørn Utzon are considered design masterpieces of the 20th Century Gehry's Museum transformed the city of Bilbao from a small industrial Spanish city into a world destination while Utzon's Opera House became the symbol of Sydney and Australia Re-imagining the Contemporary Museum

studies the most innovative examples of performance and exhibition architecture today These are projects that revolutionize architecture on many levels including sustainability aesthetics technology and urban design It is interesting to point out that these works are not concentrated in one specific region but are located in every corner of the globe from MVRDV's Comic and Animation Museum in China to the new Broad Museum in Los Angeles by Diller Scofidio Renfro or Kengo Kuma's Victoria and Albert Museum in Dundee Scotland

Cinematic Starchitecture Merrill Schleier, Paul Newland, 2025-11-03

Cinematic Starchitecture explores how examples of famous architecture have circulated throughout cinema history across diverse genres Building on the term starchitecture coined in 1997 for dramatic monumental structures designed to gain international attention and economic advantage the authors demonstrate that a crucial part of an architectural structure's iconic star status emerges through its engagement with and codification by the media and with cinema in particular This book explores how iconic architectural structures have performed a myriad of roles and functions that exceed buildings' everyday uses or identities as aesthetic objects location markers or spatial settings to show that countless films globally have featured famous buildings as inimitable components of narrative exposition character development and or identity construction This volume will appeal to students scholars and researchers of film studies media studies and architecture and architectural history as well as those in the areas of media and cultural studies history popular culture and urban geography

Urban Transformations through Exceptional Architecture Nadia Alaily-Mattar, Alain Thierstein, 2021-05-30

Urban Transformations through Exceptional Architecture focusses on the nexus between architecturally exceptional projects and the city It addresses the following questions How can the complexity of these projects be comprehended What roles do the political contexts play in the commissioning of such projects and what audiences do these projects serve How has the granting of professional recognition for architects changed and what will this change mean to measures of exceptionality in architectural design What roles do the architectural competitions play in the process of commissioning the design of architecturally exceptional projects and do design competitions as an urban planning tool grant high value designs Architecturally exceptional projects are situated in physical urban fabrics How can this situatedness be analysed and what different values does the urban design dimension of these projects add By considering diverse aspects of architecturally exceptional projects the chapters in this book utilise a variety of research methods They bring into dialogue a range of themes regarding the architectural urban design and political aspects of these projects This volume illustrates that multidisciplinary might well be the best strategy to balance the risks of over simplification and the challenges of complexity in analysing these exceptional projects and the city in its ever transformative process The chapters in this book were originally published as a special issue of the Journal of Urban Design
