Lissitz,2015-11-01 The Race To The Top RTTP federal education policy fostered a new generation of state tests This policy advocated adopting common core standards which set a higher level of learning targets for students in the US K 12 education These standards are intended to assess higher order thinking skills and prepare students ready for college and career In the meantime they are aligned with those for international assessments which keep US students abreast of their international peers Furthermore the new generation of state tests requires the use of technology enhanced items to align student assessments with student learning environment Computer technology is indispensable to accomplish this goal Computer based tests related to common core standards are different from previous state computer based tests in two important aspects one is that the current version requires accurate assessment of students along all ability levels and the other is that it promotes the use of an efficient test delivery system

essentially the use of computerized adaptive assessment in K 12 state testing programs In addition to providing summative information about student learning the new common core tests add formative assessment component in the whole assessment system to provide timely feedback to students and teachers during the process of student learning and teacher instruction As with its predecessor the new assessment policy also holds teachers and schools accountable for student learning With the requirements by the new federal education policy states formed two consortia Partnership for Assessment of Readiness for College and Careers PARCC and Smarter Balanced Assessment Consortium SBAC to develop assessments in alignment with the new common core standards This book is based on the presentations made at the Thirteenth Annual Maryland Assessment Research Center s Conference on The Next Generation of Testing Common Core Standards Smarter Balanced PARCC and the Nationwide Testing Movement Experts from the consortia and nationwide overviewed the intention history and the current status of this nationwide testing movement Item development test design and transition from old state tests to the new consortia tests are discussed Test scoring and reporting are specially highlighted in the book The challenges related to standard setting for the new test especially in the CAT environment and linking performance standards from state tests with consortium tests were explored The issues of utilizing the consortium test results to evaluate students college and career readiness is another topic addressed in the book The last chapters address the critical issue of validity in the new generation of state testing programs Overall this book presents the latest status of the development of the two consortium assessment systems It addresses the most challenging issues related to the next generation of state testing programs including development of innovative items assessing higher order thinking skills scoring of such items standard setting and linkage with the old state specific standards and validity issues This edited book provides a very good source of information related to the consortium tests based on the common core standards Taking Design Thinking to School Shelley Goldman,Zaza Kabayadondo,2016-12-01 Design thinking is a method of problem solving that relies on a complex set of skills processes and mindsets that help people generate novel solutions to problems Taking Design Thinking to School How the Technology of Design Can Transform Teachers Learners and Classrooms uses an action oriented approach to reframing K 12 teaching and learning examining interventions that open up dialogue about when and where learning growth and empowerment can be triggered While design thinking projects make engineering design and technology fluency more tangible and personal for a broad range of young learners their embrace of ambiguity and failure as growth opportunities often clash with institutional values and structures Through a series of in depth case studies that honor and explore such tensions the authors demonstrate that design thinking provides students with the agency and compassion that is necessary for doing creative and collaborative work both in and out of the classroom A vital resource for education researchers practitioners and policymakers Taking Design Thinking to School brings together some of the most innovative work in design pedagogy *Report of the Commissioner of Education* United States.
