Reflections on Human Inquiry Nirmalangshu Mukherji,2017-10-30 This original volume examines forms and limits of human inquiry from a largely sceptical point of view Human beings are endowed with cognitive agency Our grasp of the world and of ourselves are not merely responses to external stimuli they are reflective products of human inquiry At one point in human history it was thought that modern science especially theoretical physics is the paradigm of human inquiry Where does this form of inquiry significantly apply Are there limits on its claims of truth and objectivity How much of the vast canvas of human experience does it cover Where do other forms of inquiry such as philosophy religion and the arts attain their salience With the emergence of the scientific study of the human mind itself these critical questions have taken a more intriguing form in recent decades Can human inquiry investigate its own nature Can the scientific theory of language explain the richness of human expression Can a science of the mind account for human experience These probing questions on the scientific enterprise are usually addressed from the outside as it were by humanists and critical theorists In these essays they are examined from the inside by a philosopher whose primary academic work concerns the study of the human linguistic mind In that sense the sceptical inquiry turns on itself
