Commonwealth Cruisers 1939 45 New Vanguard:

Commonwealth Cruisers 1939-45 Angus Konstam, 2015-10-20 In the early 20th century Britain's largest colonies established their own small naval presence and their ships fought alongside the Royal Navy during World War I. These fleets were expanded during the inter-war years and in 1939 the Royal Australian Navy, the Royal Canadian Navy and the Royal New Zealand Navy willingly joined the fight on behalf of the British Commonwealth. For the most part these small navies consisted of a few cruisers and destroyers designed to protect territorial waters and local sea lanes. However these warships and their crews soon found themselves involved in a global war and consequently were called upon to fight wherever they were needed against the Germans, the Italians and the Japanese. This book tells the story of these small cruiser forces and the men who served the Allied cause so well during the long and brutal war at sea. **British Cruisers** Norman

Friedman, 2011-01-24 For most of the twentieth century Britain possessed both the world's largest merchant fleet and its most extensive overseas territories. It is not surprising therefore that the Royal Navy always showed a particular interest in the cruiser, a multi-purpose warship needed in large numbers to defend trade routes and police the empire. Above all other types the cruiser's competing demands of quality and quantity placed a heavy burden on designers and for most of the inter-war years Britain sought to square this circle through international treaties restricting both size and numbers. In the process she virtually invented the heavy cruiser and inspired the large 6-inch armed cruiser, neither of which ironically served her best interests. For the first time this book seeks to comprehend the full policy background from which a different and entirely original picture emerges of British cruiser development. After the war the cruiser's role was reconsidered and the final chapters of the book cover modernisations, the plans for missile-armed ships and the convoluted process that turned the through-deck cruiser into the Invincible-class light carriers. With detailed appendices of ship data and illustrated in depth with photos and A.D. Baker's specially commissioned plans, *British Cruisers* truly matches the lofty standards set by Friedman's previous books on British destroyers. Крейсерский танк Mk.VIII «Кромвель». Ширококорядов, 2017-11-06 Mk VIII 1944 1945 1942 1943 6 1944 **British Town Class Cruisers** Conrad Waters, 2019-11-18 Entering service between 1937 and 1939 the ten British Town-class cruisers were the most modern vessels of their type in the Royal Navy when the Second World War began. Built in response to large 6-inch gunned cruisers in the US and Japanese Navies and primarily designed for the defence of trade, they saw arduous service in a wide range of roles, playing a decisive part in victories such as the Battle of the Barents Sea and the destruction of the German *Scharnhorst* at the North Cape. The cost was heavy: four of the ships were lost and the other six all survived heavy damage. In some cases on more than one occasion. In this major study Conrad Waters makes extensive use of archive material to provide a technical evaluation of the Town-class design and its subsequent performance. He outlines the class's origins in the context of inter-war cruiser policy, explains the design and construction process and describes the characteristics of the resulting ships and how

these were adapted in the light of wartime developments An overview of service focuses on major engagements assessing the extent to which the class met its designers expectations and detailing the consequences of action damage Concluding chapters continue the story into the Cold War era examining the modernisation programme that kept the remaining ships fit for service during the 1950s Heavily illustrated with contemporary photographs and drawings by A D Baker III John Jordan and George Richardson British Town Class Cruisers provides a definitive reference to one of the Royal Navy s most important Second World War warship designs An Army of Never-Ending Strength Arthur W. Gullachsen,2021-02-15 An army may march on its stomach but it needs more than hot dinners to fight As Canadians battled through Northwest Europe in the late stages of the Second World War how did they reinforce their front line And at what cost An Army of Never Ending Strength investigates the operational record of the First Canadian Army during 1944 45 to provide detailed insight into its administrative systems structure and troop and equipment levels In a close analysis of monthly resources losses and replacement flow Captain Arthur W Gullachsen demonstrates the army s effectiveness at reinforcing its three traditional combat arms The total fighting power of the infantry armour and artillery units was never inhibited for long An Army of Never Ending Strength draws a powerful conclusion the administrative and logistical capability of the Canadian Army created a constant state of overwhelming offensive strength which made a marked contribution to eventual Allied victory
