Comfortably Numb How Psychiatry Is Medicating A Nation:

Comfortably Numb Charles Barber, 2009-02-10 American doctors dispense approximately 230 million antidepressant prescriptions every year more than any other class of medication Charles Barber explores this disturbing phenomenon examining the ways in which pharmaceutical companies first create the need for a drug and then rush to fill it Most importantly he convincingly argues that without an industry to promote them non pharmaceutical approaches are tragically overlooked in favor of an instant cure for all emotional difficulties Compulsively readable and urgently relevant *Comfortably Numb* is an unprecedented account of the impact of psychiatric medications on American culture and on Americans themselves

Rethinking Depression Eric Maisel, 2012 Eric Maisel invites depression sufferers and their service providers to consider whether human sadness has been monetised into the disease of depression and asks readers to consider the personal implications of this 50 year cultural shift from human problem to medical ailment *Being Saved*

Mark Hamilton, 2018-08-30 With contributions from leading theologians and philosophers *Being Saved* Explorations in Human Salvation brings together a series of essays on the major topics relating to the doctrine of salvation The book provides readers with a critical resource that consists of an integrative philosophical theological method and will invigorate this much needed discussion Contributors include Oliver Crisp Fuller Theological Seminary Paul Helm Regent College Vancouver and Highland Theological College Scotland Joanna Leidenhag University of Edinburgh Andrew Loke Hong Kong University

Handbook of Social Justice in Loss and Grief Darcy L. Harris, Tashel C. Bordere, 2016-02-05 The *Handbook of Social Justice in Loss and Grief* is a scholarly work of social criticism richly grounded in personal experience evocative case studies and current multicultural and sociocultural theories and research It is also consistently practical and reflective challenging readers to think through responses to ethically complex scenarios in which social justice is undermined by radically uneven opportunity structures hierarchies of voice and privilege personal and professional power and unconscious assumptions at the very junctures when people are most vulnerable at points of serious illness confrontation with end of life decision making and in the throes of grief and bereavement Harris and Bordere give the reader an active and engaged take on the field enticing readers to interrogate their own assumptions and practices while increasing chapter after chapter their cultural literacy regarding important groups and contexts The *Handbook of Social Justice in Loss and Grief* deeply and uniquely addresses a hot topic in the helping professions and social sciences and does so with uncommon readability

Speaking of Sadness David Allen Karp, 2017 *Speaking of Sadness* based on fifty in depth interviews provides first hand accounts of the depression experience while discovering clear regularities in the ways that personal identities are shaped over the course of an illness career The new edition of the book is highlighted by a thoroughly new and extensive introduction

PSYCHOLOGY *Rehabilitation Work* Hannah Graham,2016-05-26 Conversations about rehabilitation and how to address the drugs crime nexus have been dominated by academics and policymakers without due recognition of the experience and knowledge of practitioners Not enough is known about the cultures and conditions in which rehabilitation occurs Why is it that significant numbers of practitioners are leaving the alcohol and other drugs field while disproportionate numbers of criminal justice practitioners are on leave *Rehabilitation Work* provides a unique insight into what happens behind the closed doors of prisons probation and parole offices drug rehabs and recovery support services drawing on research from Australia This book is among the first to provide a dedicated empirical examination of the interface between the concurrent processes of desistance from crime and recovery from substance misuse and the implications for rehabilitation work Hannah Graham uses practitioner interviews workforce data and researcher observations to reveal compelling differences between official accounts of rehabilitation work and what practitioners actually do in practice Practitioners express a desire to be the change rather than being subject to change actively co producing progressive reforms instead of passively coping with funding cutbacks and interagency politics Applied examples of how practitioners collaborate lead and innovate in the midst of challenging work are complemented with evocative illustrations of insider humour and professional resilience This book is a key resource for students academics and practitioners across fields including criminology and criminal justice social work psychology counselling and addiction treatment

What is Criminology? Mary Bosworth,Carolyn Hoyle,2012-05-31 Criminology is a booming discipline yet one which can appear divided and fractious In this rich and diverse collection of 34 essays some of the worlds leading criminologists respond to a series of questions designed to investigate the state impact and future challenges of the discipline What is criminology for What is the impact of criminology How should criminology be done What are the key issues and debates in criminology today What challenges does the discipline of criminology face How has criminology as a discipline changed over the last few decades The resulting essays identify a series of intellectual methodological and ideological borders Borders in criminology as elsewhere are policed yet they are also frequently transgressed criminologists can and do move across them to plunder admire or learn from other regions While some boundaries may be more difficult or dangerous to cross than others it is rare to find an entirely secluded locale or community In traversing ideological political geographical and disciplinary borders criminologists bring training tools and concepts as well as key texts to share with foreigners From such exchanges over time borders may break down shift or spring up enriching those who take the journey and those who are visited It is in other words in criminologys capacity for and commitment to reflexivity on which the strength of the field depends

Chemically Imbalanced Joseph E. Davis,2020-03-10

A study of how ordinary people deal with everyday problems through self mastery and mental health care practices Everyday suffering those conditions or feelings brought on by trying circumstances that arise in everyone s lives is something that humans have grappled with for millennia But the last decades have seen a drastic change in the way we approach it In the past a person going through a time of difficulty might keep a journal or see a therapist but now the psychological has been replaced by the biological instead of treating the heart soul and mind we take a pill to treat the brain Chemically Imbalanced is a field report on how ordinary people dealing with common problems explain their suffering how they re increasingly turning to the thin and mechanistic language of the body brain and what these encounters might tell us Drawing on interviews with people dealing with struggles such as underperformance in school or work grief after the end of a relationship or disappointment with how their life is unfolding Joseph E Davis reveals the profound revolution in consciousness that is underway We now see suffering as an imbalance in the brain that needs to be fixed usually through chemical means This has rippled into our social and cultural conversations and it has affected how we as a society imagine ourselves and envision what constitutes a good life Davis warns that what we envision as a neurological revolution in which suffering is a mechanistic problem has troubling and entrapping consequences And he makes the case that by turning away from an interpretive meaning making view of ourselves we thwart our chances to enrich our souls and learn important truths about ourselves and the social conditions under which we live Praise for Chemically Imbalanced Chemically Imbalanced is an excellent addition to the works in social sciences and humanities that examine the distress of ordinary Americans from the second half of the twentieth century onward a period when commercialized pills and the psychology based notion of self improvement entered the minds of Americans Metascience Chemically Imbalanced raises important questions offers new insight into the power and reach of the biomedical model and neurobiological thinking and I highly recommend it I encourage readers to assign it especially in graduate level mental health and illness classes or any class looking for a discussion on people s experiences with suffering and the broad impacts of biomedical thinking and treatment Social Forces
