Justice Henry Shue, 2014-06-12 The fruit of twenty years of moral reflection on the emerging greatest challenge to humanity of the 21st century these far sighted and influential essays by a pioneering practical philosopher on the tangled questions of justice between nations and justice across generations confronting all attempts at international cooperation in controlling climate change sharply crystallize the central choices and offer constructive directions forward Arguing that persistent attempts by U S negotiators to avoid the fundamental issues of justice at the heart of persistent international disagreement on the terms of a binding multilateral treaty are as morally misguided as they are diplomatically counter productive Henry Shue has built a case that efforts to price carbon through cap and trade or carbon taxes as a mechanism to drive down greenhouse gas emissions by the affluent must for both ethical and political reasons be complemented by international transfers that temporarily subsidize the development of non carbon energy and its dissemination to those trapped in poverty Our vital escape from climate change rooted in the dominance of the fossil fuel regime ought not and in fact need not come at the price of de railing the escape of the world s poorest from poverty rooted in lack of affordable energy that does not undermine the climate The momentum of changes in the planetary climate system and the political inertia of energy regimes mean that future generations like the poorest of the present are vulnerable to our decisions and they have rights not to be left helpless by those of us with the power instead to leave them hope **Mr. Emerson's Wife** Amy Belding Brown, 2006-05-30 This portrait of a marriage between a young strong minded girl and one of America s greatest philosophers joins the ranks of bestsellers like *Girl with a Pearl Earring* and *Ahab s Wife* *Environmental Health* Kathryn Hilgenkamp, 2005 *Environmental Health Ecological Perspectives* is intended as an environmental health text for both undergraduate and graduate levels This text provides balanced coverage of how humans are affected by the quality of air water and food as well as how humans affect these survival necessities The evolution and prosperity of the human species has resulted in concerns about pollution overpopulation and several other issues that are having a harmful effect on humans and our environment This knowledge along with an understanding of the legislation and history of environmental issues will help students to make positive changes in their behavior and in the world around them *Climate Ethics* Stephen Gardiner, Simon Caney, Dale Jamieson, Henry Shue, 2010-07-30 This collection gathers seminal papers from the emerging area of ethics and climate change It should be of broad interest to those concerned with global justice environmental science and policy and the future of humanity *The Utne Reader* , 2001
