Coming Home To The Pleistocene:

Coming Home to the Pleistocene Paul Shepard, 2013-04-16 When we grasp fully that the best expressions of our humanity were not invented by civilization but by cultures that preceded it that the natural world is not only a set of constraints but of contexts within which we can more fully realize our dreams we will be on the way to a long overdue reconciliation between opposites which are of our own making from *Coming Home to the Pleistocene* Paul Shepard was one of the most profound and original thinkers of our time Seminal works like *The Tender Carnivore* and *the Sacred Game* *Thinking Animals* and *Nature and Madness* introduced readers to new and provocative ideas about humanity and its relationship to the natural world Throughout his long and distinguished career Paul Shepard returned repeatedly to his guiding theme the central tenet of his thought that our essential human nature is a product of our genetic heritage formed through thousands of years of evolution during the Pleistocene epoch and that the current subversion of that Pleistocene heritage lies at the heart of today's ecological and social ills *Coming Home to the Pleistocene* provides the fullest explanation of that theme Completed just before his death in the summer of 1996 it represents the culmination of Paul Shepard's life work and constitutes the clearest most accessible expression of his ideas *Coming Home to the Pleistocene* pulls together the threads of his vision considers new research and thinking that expands his own ideas and integrates material within a new matrix of scientific thought that both enriches his original insights and allows them to be considered in a broader context of current intellectual controversies In addition the book explicitly addresses the fundamental question raised by Paul Shepard's work What can we do to recreate a life more in tune with our genetic roots In this book Paul Shepard presents concrete suggestions for fostering the kinds of ecological settings and cultural practices that are optimal for human health and well being *Coming Home to the Pleistocene* is a valuable book for those familiar with the life and work of Paul Shepard as well as for new readers seeking an accessible introduction to and overview of his thought *Proceedings RMRS.*, 1998

Humanism: In Command or in Crisis? Michael A. Schuler, 2023-08-31 According to bestselling historian Yuval Noah Harari today's average American has their foot in three ideological camps nationalism free market capitalism and humanism The first two might seem obvious but the third It's entirely possible that most who qualify for that label would be hard pressed to explain its meaning much less use it self descriptively This book is designed to serve two important purposes First to provide an accessible resource for anyone curious about the humanist tradition and the arguments advanced by leading contemporary proponents Second to address what the author believes is a critical question for our time the era of the Anthropocene Is humanism's seemingly benign package of values at least partially responsible for some of the world's most pressing problems To answer the last question Schuler draws from an elective collection of commentators including life scientists spiritual writers public intellectuals technologists novelists and even poets In the end this wide ranging survey will help the reader determine whether humanism makes sense for them ***Walking in the Land of Many Gods*** A. James

Wohlpert,2013 How are we placed on Earth What is our relationship to the world around us and how does our thinking affect the way we relate to the world We are entrapped says A James Wohlpert by what Martin Heidegger calls enframing a worldview that considers all objects as mere resources for our use Walking in the Land of Many Gods envisions a new way of thinking about the world one grounded in a moral imagination reconnected to Earth Insightful readings of three contemporary classics of nature writing Janisse Ray s Ecology of a Cracker Childhood Terry Tempest Williams s Refuge An Unnatural History of Family and Place and Linda Hogan s Dwellings A Spiritual History of the Living World are at the heart of Wohlpert s endeavor Powerful and affecting works like these reveal a pathway to a deeper remembering one that reconnects us with the primal forces of creation and acknowledges the sacredness of the world We have forgotten that the world around us is rich and fertile and generative says Wohlpert His exploration of these literary works based on deep anthropology and Native American philosophy opens a pathway into a new way of thinking called sacred reason Founded on interdependence and interrelationship and on care and compassion sacred reason reminds us that divinity exists around us at all times We are invited to walk once again in a land filled with many gods

Personal, Societal, and Ecological Values of Wilderness ,2000 A World Not Made for Us Keith R. Peterson,2020-09-01 In A World Not Made for Us Keith R Peterson provides a broad reassessment of the field of environmental philosophy taking a fresh and critical look at three classical problems of environmentalism the intrinsic value of nature the need for an ecological worldview and a new conception of the place of humankind in nature He makes the case that a genuinely critical environmental philosophy must adopt an ecological materialist conception of the human a pluralistic value theory that emphasizes the need for value prioritization and a stratified categorial ontology that affirms the basic principle of human asymmetrical dependence on more than human nature Integrating environmental ethics with the latest work in political ecology Peterson argues it is important to understand that the world is not made for us and that coming to terms with this fact is a condition for survival in future human and more than human communities of liberation and solidarity

An Ecology of Communication William Homestead,2021-04-20 An Ecology of Communication addresses an ecological and communicative dilemma the universe earth and socio cultural life world are resoundingly dialogic yet we have created modern and postmodern cultures largely governed by monologue This book is indispensable reading for scholars and students of communication ecology and social sciences as it moves readers beyond the anthropocentric bias of communication study toward a listening based model of communication an essential move for discerning fitting responses and the call to responsibility in an age of ecocrisis
