Commercial Law Selected Statutes 2009 2010 Edition:

Commercial Law, Selected Statutes, 2008 Towards Reforming the Legal Framework for Secured Transactions in Nigeria Chima Williams IHEME, 2016-08-16 This book offers a valuable guide to one of the most challenging areas of commercial law now frequently referred to as secured transactions with a focus on Nigerian Canadian and United States perspectives A debtor's ability to provide collateral influences not only the cost of the money borrowed but also in many cases whether secured lenders are willing to offer credit at all The book proposes that increasing access to and indeed lowering the cost of credit could tremendously boost economic development while at the same time arguing that this would best be achieved if the legal framework for secured transactions in Nigeria and of course any other country with similar experiences were designed to allow the use of personal property and fixtures to secure credit Similarly the creation priority perfection and enforcement of security interests in personal property should be simplified and supported by a framework that ensures that neither the interests of secured lenders nor debtors are hampered so as to guarantee the continuous availability of affordable credit as well as debtors willingness to borrow and do business The book further argues that in addition to the obvious preference for real property over personal property by secured lenders due to the unreformed secured transactions legal framework in Nigeria its compartmentalized nature has also resulted in unpredictability in commerce and the concomitant effects of poor access to credit Through the comparative research conducted in this book utilizing the UCC Article 9 and Ontario PPSA as benchmarks the author provides reformers with a repository of tested secured transactions law solutions which law reformers in the Commonwealth countries in Africa and beyond as well as the business community will find valuable in dealing with issues that stem from secured transactions **Commercial Law Reports 2016**, 2016-12-31

Chester Brown,2013-01-17 The existing literature on the substantive and procedural aspects of bilateral investment treaties BITs relies heavily on investment treaty arbitration decisions as a source of law What is missing is a comprehensive analytical review of state practice This volume fills this gap providing detailed analyses of the investment treaty policy and practice of nineteen leading capital exporting states and emerging market economies The authors are leading experts in government academia and private legal practice and their chapters are largely based on primary source materials Each chapter provides a description of the regulatory or policy framework governing foreign investment both inflows and outflows with a historical presentation of the state s Model BIT an examination of internal government processes and practices relating to treaty negotiation conclusion ratification and record keeping and a detailed article by article analytical commentary of the state s Model BIT elucidating the policy behind each provision and highlighting the ways in which the actual investment treaty practice of that state deviates from this standard text This commentary is supplemented by the case law relevant to that state s investment treaties This commentary will be of immense assistance to counsel and arbitrators engaged in arguing and determining the proper interpretation of BITs and investment chapters in Free Trade Agreements and to government officials and scholars engaged in BIT policy formulation and implementation It will serve as a standard resource for legal practitioners scholars policy makers and other stakeholders in the field of international investment policy law and arbitration

Transnational Securities Regulation Antonio Marcacci,2022-11-25 The book provides an analysis of the emergence evolution and transformation of transnational securities regulation and of the influences from and the interactions between

global regulatory powers in the field Combining insights from law and political science the work employs a two tier complementary on the books and in action approach The more classical on the books approach draws on scholarship in United States and European Union securities regulation transnational regulation and global administrative law regime complexity global governance studies and the regulatory production of the International Organisation of Securities Commissions IOSCO The law in action approach leverages the author s experience as Compliance senior professional in a multinational financial institution as well as research interviews with senior IOSCO staff The author s findings enable the reader to develop an original understanding of IOSCO its standards and its unique place in the transnational regulatory arena They also challenge the doxa that the US are the only driving regulatory power in the securities area when in fact other regulatory powers are emerging for the time being the EU The balance has shifted and regulatory compromises are achieved at different points in the rule making process
