Dowd,Adam Zucker,2015-05-15 This collection of original essays honors the groundbreaking scholarship of Jean E Howard by exploring cultural and economic constructions of affect in the early modern theater While historicist and materialist inquiry has dominated early modern theater studies in recent years the historically specific dimensions of affect and emotion remain underexplored This volume brings together these lines of inquiry for the first time exploring the critical turn to affect in

literary studies from a historicist perspective to demonstrate how the early modern theater showcased the productive interconnections between historical contingencies and affective attachments. Considering well known plays such as Shakespeare's *Antony and Cleopatra* and Thomas Dekker's *The Shoemaker's Holiday* together with understudied texts such as court entertainments and examining topics ranging from dramatic celebrity to women's political agency to the parental emotion of grief, this volume provides a fresh and at times provocative assessment of the historical affects: financial, emotional, and socio-political that transformed Renaissance theater. Instead of treating history and affect as mutually exclusive theoretical or philosophical contexts, the essays in this volume ask readers to consider how drama emplaces the most personal, unspeakable passions in matrices defined in part by financial exchange, by erotic desire, by gender, by the material body, and by theatricality itself. As it encourages this conversation to take place, the collection provides scholars and students alike with a series of new perspectives not only on the plays, emotions, and histories discussed in its pages but also on broader shifts and pressures animating literary studies today.

[Mermaids and the Production of Knowledge in Early Modern England](#) Tara E. Pedersen, 2016-04-22. We no longer ascribe the term mermaid to those we deem sexually or economically threatening; we do not ubiquitously use the mermaid's image in political propaganda or feature her within our houses of worship; perhaps most notably, we do not entertain the possibility of the mermaid's existence. This author, Tara Pedersen, argues that it is difficult for contemporary scholars to consider the mermaid as a figure who wields much social significance. During the early modern period, however, this was not the case, and Pedersen illustrates the complicated category distinctions that the mermaid inhabits and challenges in 16th and 17th century England. Addressing epistemological questions about embodiment and perception, this study furthers research about early modern theatrical culture by focusing on under-theorized and seldom-acknowledged representations of mermaids in English locations and texts. While individuals in early modern England were under pressure to conform to seemingly monolithic ideals about the natural order, there were also significant challenges to this order. Pedersen uses the figure of the mermaid to rethink some of these challenges. For the mermaid often appears in surprising places; she is situated at the nexus of historically specific debates about gender, sexuality, religion, the marketplace, the new science, and the culture of curiosity and travel. Although these topics of inquiry are not new, Pedersen argues that the mermaid provides a new lens through which to look at these subjects and also helps scholars think about the present moment, methodologies of reading, and many category distinctions that are important to contemporary scholarly debates.
