Creating The Judicial Branch Creating The Judicial Branch:

Creating the Judicial Branch Robert W. Tobin, 2004 One thing is clear Courts came alive in the twentieth century and made changes that could not have been envisioned as late as World War II From Chapter 6 Creating the Judicial Branch The Unfinished Reform describes and assesses a recent historical phenomenon the creation of administratively and organizationally coherent judicial systems within state government Before 1950 the state judicial branch of government existed mostly in concept not in operational reality After 1950 state judges the organized bar and many students of the judiciary took a hard look at the way state courts were organized and managed They concluded that state courts particularly the trial courts were externally dominated highly disorganized often unprofessional and poorly managed to the point where the integrity of the state courts was being seriously undermined State after state initiated court reforms and brought about many remarkable improvements Courts were caught up in a reform wave that swept all three branches of state government but took a unique form in the courts Unlike the executive and legislative branches the state courts were not simply seizing management control of their own domain but literally creating a third branch of government They sought this objective by integrating the various components of the state judiciary into a more coherent whole and generally upgrading the level of professionalism and the quality of justice

Creating the Judicial Branch Robert Tobin, 1999 **Building the Judiciary** Justin Crowe, 2012-03-25 How did the federal judiciary transcend early limitations to become a powerful institution of American governance How did the Supreme Court move from political irrelevance to political centrality Building the Judiciary uncovers the causes and consequences of judicial institution building in the United States from the commencement of the new government in 1789 through the close of the twentieth century Explaining why and how the federal judiciary became an independent autonomous and powerful political institution Justin Crowe moves away from the notion that the judiciary is exceptional in the scheme of American politics illustrating instead how it is subject to the same architectonic politics as other political institutions Arguing that judicial institution building is fundamentally based on a series of contested questions regarding institutional design and delegation Crowe develops a theory to explain why political actors seek to build the judiciary and the conditions under which they are successful He both demonstrates how the motivations of institution builders ranged from substantive policy to partisan and electoral politics to judicial performance and details how reform was often provoked by substantial changes in the political universe or transformational entrepreneurship by political leaders Embedding case studies of landmark institution building episodes within a contextual understanding of each era under consideration Crowe presents a historically rich narrative that offers analytically grounded explanations for why judicial institution building was pursued how it was accomplished and what in the broader scheme of
