## **De Roof Van De Double Eagle:**

Neptune and the Netherlands Louis Sicking, 2004-06-01 This book investigates how the rulers of the Habsburg world empire developed and implemented a central maritime policy for the Netherlands and appointed an admiral of the sea or admiral general for that purpose It also explains why the Habsburgs were eventually unable to gain control of the maritime affairs of the Netherlands in spite of the support of the powerful Burgundian Lords of Veere who occupied the central position of admiral from 1491 to 1558 From their power base on the island of Walcheren in Zeeland known as the key to the Netherlands at the time because of its central location between Holland Flanders Antwerp and the sea they held an ideal vantage point for exercising the admiralty The result not only offers an illuminating insight into the organisation of the war fleet maritime trade and fishery privateering and prize law in the Habsburg Netherlands but also puts the success of the later Dutch Republic in a new perspective
